

AUGUST 2021

# OSHKOSH AREA SCHOOL DISTRICT PROJECT PROGRESS REPORT

## WHAT'S NEW?

In August, construction on this summer's projects wrapped up. All five schools were ready for the first day of classes. Please look at some of the photos below and on the following page. The new Middle School design continues to be in full production mode as we dive further into details on how the building will operate. Design work on North High School, West High School, Oakwood Elementary School, and Read Elementary School has come a long way in the past month. It's exciting to see some of the preliminary exterior elevations photos below.

### PLANNING & DESIGN UPDATE

At the new Middle School, design meetings have been set up between the Oshkosh Area School District, the City of Oshkosh, and Bray Architects to work through community input, plan commission, and site approval. These meetings are on going from September to December. Current design work at North High School, West High School, Oakwood Elementary, and Read Elementary have made good progress on both the exterior,

**(Planning & Design Update, continued)** as well as refined portions within the addition and remodeling areas. The core planning team for these four schools has included building principals, assistant principals, and district administration. Over the next month, we will be reviewing interior finish palettes, and specific needs for storage at the main reception, health, and classroom areas.

RENDERING OF THE NEW ADDITION AT NORTH HIGH SCHOOL

## WHAT'S NEXT?

- » Meetings with the City of Oshkosh on the development of the new Middle School site.
- » Interior Design Presentations for the North High School, West High School, Oakwood Elementary, and Read Elementary projects.
- » Over the next month, the Oshkosh Area School District will be reviewing qualification statements for the General Contractor of the new Middle School. This helps the District verify that the contractors bidding on the job can handle the fiscal responsibility of the job, has the person-power needed to complete the job, and a history in working with K12 building construction, and many other items of criteria.
