

FALL 2021

# OSHKOSH AREA SCHOOL DISTRICT SUMMER PROJECTS UPDATE

## WHAT'S NEW?

Last June, after the 2020-2021 school year, the Oshkosh Area School District kicked off its summer secure entry construction projects. The construction included adding secure entrances at five OASD schools. In addition, ADA accessibility renovations also took place at each school. The summer construction projects occurred at; Emmeline Cook Elementary School, Franklin Elementary School, Lakeside Elementary School, South Park Middle School, and Carl Traeger Elementary/Middle School.

### EMMELINE COOK ELEMENTARY UPDATE

Emmeline Cook's secure entry project included reworking the reception area, principal's office, and health room to provide a safe and secured entry. These changes also allow visibility from the reception desk into the Health Room and easy access from the reception area to the Principal's Office. The renovation also included a new ADA compliant restroom inside of the health room.

### FRANKLIN ELEMENTARY UPDATE

Franklin Elementary's summer project included numerous different areas. In addition to the secure entry and office, work was also completed on a new health room with an ADA bathroom, a remodeled principal office, revised access to the cafeteria, and a renovated staff lounge to help support the main office. Franklin's staff also worked creatively with Bray Architects to utilize the new reception desk, which allows for more workflow and enhances their staff lounge.

### LAKESIDE ELEMENTARY UPDATE

Lakeside's secure entry project remodeled their reception area, their health room and added an ADA-compliant restroom inside the Health Room. The remodel supports the new secure entries being constructed on a District-wide level.

### SOUTH PARK MIDDLE SCHOOL UPDATE

South Park's renovation included a new door off of the renovated vestibule that leads directly into the office, which greets visitors with a new reception desk and a secure entry sequence. In addition, new carpet, paint, and ceilings make this office feel brand new.

### CARL TRAEGER ELEMENTARY/MIDDLE SCHOOL UPDATE

Carl Traeger's renovation included work at both the Elementary School and Middle School entries. We aimed to create a similar feel of each space with the understanding they serve two different groups of children, staff, parents, and visitors. The renovation included adding a door into each office from the secure entry vestibule. It also included a new reception desk with integrated power, security, and storage.
