Hello RAHS Families and Community –

Congratulations go out to Junior **Emily Batig**, who was selected to represent the Aeronautic Science Pathway program this summer, at the National Flight Academy in Pensacola, FL! We are super proud of you Emily and all of your hard work and dedication. Way to go Emily!

Today we recall the incredible contribution that Aviator **Bessie Coleman** made to this history of aviation. Hailing from both African American and Native American descent, Ms. Coleman, (1892-1926) was the first female from both ethnic heritages to earn her pilot license. But because there were no aeronautical facilities that would teach minority women to fly in America, Coleman had to earn her license in France, which she did in 1921. When she returned to the States, she became a celebrity and built her career as an airshow pilot. Although she had big dreams of starting an African American flying school, she sadly died during a test flight in 1926. Still, her legacy will never be forgotten. To learn more, you can visit [Bessie Coleman](#) here.

Raisbeck Aviation High School is very proud to be a part of two organizations that help develop and further the cause of STEM and Hands-On learning throughout the US. The **National Consortium of Secondary STEM Schools (NCSSSS)** is a group of over 80 high schools plus industry and collegiate partners that advance professional development opportunities for teachers and networking and scholarship opportunities for students. We are fortunate to be a part of this network. The **Center for Advanced Professional Studies (CAPS)** is also a network of high-achieving schools that promote mentor, internship and hands-on learning opportunities for students. We are excited to be exposed to many different models of successful schools and look forward to learning with, and from, both of these organizations.

Have a wonderful week.

*Therese Tipton*
