## THE POLICY

The Salt Lake City School District Board of Education will design, construct, and maintain safe and efficient district buildings and grounds. All facilities should support the district's educational mission, and comply with all applicable health, safety, energy, and security rules and regulations. The board also commits to utilize sustainability practices by creating buildings and using processes that are environmentally responsible and resource-efficient throughout a building's life cycle: from siting to design, construction, operation, maintenance, renovation, and deconstruction. In accordance with its *Resolution to Establish Goals for Sustainability, Clean Energy, and Carbon Neutrality*, the Board is committed to using 100 percent clean, renewable energy in its electricity sector by 2030, and meeting 100 percent of all district operations energy needs with carbon neutral energy by 2040.

The purpose of this policy is to guide the regular operation, maintenance, and orderly development of the district's physical facilities.

The board must approve all major capital project proposals, the architect selected for each project, and the corresponding building contract. Construction and renovation contracts must comply with all state and federal procurement laws, as well as Board Policy F-2: Purchasing, and its accompanying administrative procedures.

The district has set forth its specific processes for implementing this board policy through the accompanying [administrative procedures](#).
