## LEAPFROG **Ages 4 - 5**

Leapfrog engages young learners in an exploration of math, science, and literacy activities that are hands-on and inquiry-based. These classes nurture your child's curiosity, allow imaginations to flourish and encourage a love for learning.

## STEPPING STONE **Entering Grades 1 - 3**

Stepping Stone inspires children to explore new and exciting topics that incorporate inquiry-based activities, global themes and project-based work. Students will form friendships with other learners who share their passion for the same topic.

## MOSAIC **Entering Grades 2 - 6**

Mosaic brings together a broader range of students in an effort to foster and encourage a patchwork of new ideas and lines of inquiry. With mixed-age groups, students learn from their instructor and from one another.

## SOARING **Entering Grades 3 - 6**

Soaring challenges learners to broaden their thinking through in-depth study of topics offered by our talented instructors. Classes will be taught with inquiry in mind, allowing students to express themselves creatively.
