# Summer Academy

Summer Academy provides a summer academic boost in a small-group tutoring format. Since the groups are small, the teachers can tailor the instruction to the needs of the students in the group.

This course is designed to continue and support academic skills in a group setting, rather than remediation of significant academic needs, which requires 1-to-1 skilled intervention.

Teachers will help students build upon their strengths while addressing areas needing improvement. Each experienced, licensed teacher will work with a group of five or fewer students in reading, writing, and math.

Various methods and activities will be utilized, including practice drills, projects, games, and discussions. The morning will be divided into three sections, focusing on one subject during each section, with a short break between sections. Parents/guardians must complete an information sheet that needs to be turned in before the start of the session.

## This course is appropriate for:

Students who are performing below grade level and need some help to meet expectations in the upcoming school year.

Students who are performing at grade level and would like to maintain their skills over the summer.

Students who are performing above grade level and would enjoy enriching their skills over the summer.
