

**Addendum #2**  
**RFP #22-06-157 Grounds**  
**Questions and Answers**

1. Does WCRESA has any historical information of the past three years to share regarding Tree Trimming? Particularly, how many trees were removed in the past three years? How much trimming using lifts was required?

The tree trimming highlighted on the map in orange is done yearly, along with the shrubs. The trees in the outlying areas, highlighted in green on the map, are to be trimmed for a total of 40 hours per year.

Tree removal is not included in the RFP.

We do not keep historical information on lift usage.
