3 TIPS TO PROTECT PRIVATE INFORMATION

Is your social media account on private mode? Check your social media account by viewing your profile, is it set to private or public? By setting your account on private mode you limit the number of unknown eyes viewing your information.

Switch up the Password. I Know it's easier to remember just one password but in the event where a trespasser discovers that password, that invader has won the lottery to access all accounts. Switch it up and find a secure location to write down your passwords.

Don't Click On It! Think carefully before you click on any link or attachment coming from an unknown sender. Scammers are creative, so pause and think before reacting to enticing threats.
