

Get a head start with STEM in Middle School!

These classes provide a robust, deep foundation in STEM content, connect to HS CTE Pathways, and use PLTW curriculum!

Fundamentals of Computer Science

Design interactive games, animations, and stories using the programming language Python.

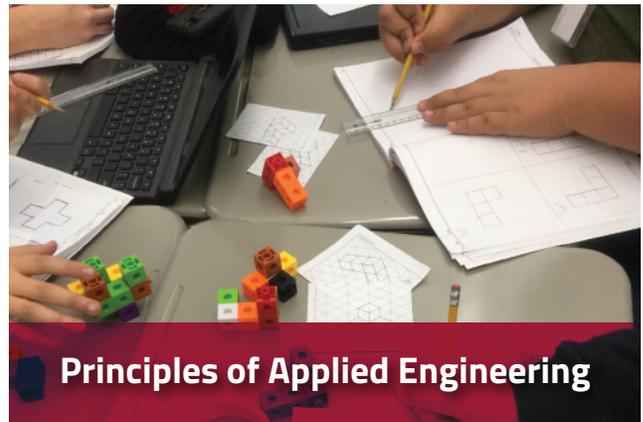

Robotics 1

Design, build and test robots to solve complex problems.

Medical Terminology

Play the role of real-life medical detective as you collect and analyze medical data to solve medical mysteries.

Principles of Applied Engineering

Design solutions to problems using engineering design, 3D modeling and innovative thinking.
