Supervised COVID-19 Rapid Test Instructions

VAULT HEALTH

IMPORTANT

DO NOT open your test kit until instructed to do so.

1 **Go to rapidtest.vaulthealth.com to register your test kit. Enter the company code provided to you to enter.**
You'll be asked to create a Vault account, or log in.

2 **Meet with a Vault testing supervisor via Zoom call.**
Your online patient flow will guide you through to the testing supervisor's waiting room. Onscreen instructions will appear while you wait.

This is **NOT** a do-it-yourself at-home test. You must provide the sample under virtual supervision, otherwise the test results will be invalidated.

3 **Provide sample.**
The testing supervisor will instruct you on proper sample collection. Once provided, you'll be sent back to the waiting room to wait the 15 to 30 minutes the test needs to fully process.

4 **Receive results.**
Once the processing time is complete, the supervisor will bring you back into the Zoom call to submit your test result. You'll receive an email when your result is ready. You can also sign in to your Vault account to view current or past results.
