Problem Solving within 10: Add To with Result Unknown

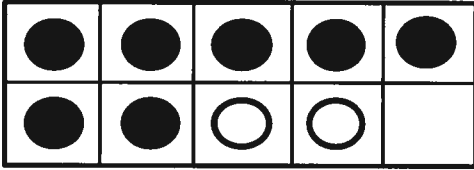

You will use a ten frame to solve addition word problems.

Example:

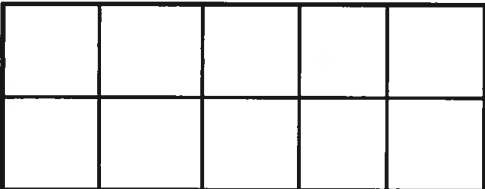

7 children are playing a game.

2 more children come to play.

How many children are there now?

<p>My Model:</p> 	<p>My Number Sentence:</p> $\underline{\quad 7 \quad} + \underline{\quad 2 \quad} = \boxed{9}$
<p>My Answer:</p> <p>There are <u> 9 </u> children.</p>	

1. Sam has 5 blue fish. He added 3 yellow fish. How many fish does Sam have now?

<p>My Model:</p> 	<p>My Number Sentence:</p> $\underline{\quad \quad} + \underline{\quad \quad} = \boxed{\quad}$
<p>My Answer:</p> <p>Sam has <u> </u> fish.</p>	

Name: _____

Date: _____

Teacher: _____
