

Welcome to the 2022 TechSmart Art Contest!

2021 Art Contest Winners

Wizard Lady

Chimera

Slime Blob

How does it work?

Create artwork that can be transformed into a sprite in the TechSmart platform. As a reminder, a sprite is computer graphic that can be moved on screen. **You can submit any kind of sprite idea** - realistic or fanciful, people or objects, etc.

If your artwork is chosen by TechSmart staff, our artist Heewon will transform your design into a sprite that will be available in the Asset Library of TechSmart Platform for **everyone across the country to use!**

What kind of art can I submit?

You can create your art in **any medium** - if it's on paper, you can just take a picture of your artwork and submit a photo.

What is not allowed? - Sprite Sheets, Backgrounds, any image that you did not create yourself, or any artwork that has clear likeness to existing intellectual property (eg. Pokemon, Minecraft, etc.).

How do I submit my artwork?

Complete the form at bit.ly/ts-art. The deadline is **April 1st, 2022**.

What are the awards?

The competition has three categories for entry:

- Elementary School (3rd - 5th grade)
- Middle School (6th - 8th grade)
- High School (9th - 12th grade)

Our TechSmart staff will choose winning sprite artwork in each category, and those winners will have their artwork transformed into sprites. We will also choose a group of honorable mentions for other outstanding artwork.
