

Study Plus

Description

Study Plus is an intervention programme for Key Stage 4 students that is designed to raise standards at GCSE, principally in English and Mathematics, but also in other GCSE subjects by improving literacy, numeracy and learning in general. As an approach, Study Plus helps personalise learning for students.

Student Criteria

Students who find it difficult to manage lots of different subjects and would like to concentrate on a more focused few would benefit from this course. Miss Oakley can be contacted for further details.

Assessment

There is no assessment for this subject but it will help students with their exams and coursework in all the other subjects they take.

Progression

Study Plus will help with all other subjects, no matter what students choose to study. It will enable them to do better than they normally would and hence aid their chances of moving on to their choice of career or further education.
