

Unit 5 Plants and Animals

Grade K Science

Unit Description:

Students apply the previous knowledge of plants and animals changing their environment. They will use observations to describe patterns of what plants and animals need to survive. Students will use models to represent the relationship between the needs of different plants or animals (including humans) and the places they live.

Science Standards:

- | | |
|-----------------|--|
| K-LS1-1 | Structures and Processes: Use observations to describe patterns of what plants and animals (including humans) need to survive. Use a model to represent the relationship between the needs of different plants or animals (including humans) and the places they live. |
| K-ESS3-1 | |

Enduring Understandings- Unit Anchor Phenomenon:

The flowers on sunflower plants face a different direction during different times of the day.

Essential Questions- Reflective Summaries:

- Describe the relationship between the sunflower plant and where it lives.
- Use observations to describe the patterns of the sunflower plant's "behavior".
