LOMPOC UNIFIED RECOGNIZED FOR COMMUNITY ENGAGEMENT

This week Lompoc Unified School District was recognized for their dedication to working with the community and ensuring that various educational partners have a voice in the decision making. Specifically, Gobo stated that LUSD was being celebrated for “your commitment to exceptional stakeholder engagement, we wanted to applaud the effort and investment Lompoc USD has made to support your community’s education partners. Your efforts to connect with stakeholders through meetings, surveys, and the use of actionable and accountable tools, such as the LCAP infographic, demonstrate your exemplary commitment to engagement, collaboration, and the success of your students. Because our company founder is a former School Board Trustee, we have a special understanding and appreciation for the hard work of Districts and their staff. Thank you for the work you do on our collective behalf for California's students, ensuring a brighter future for us all.” Mr. McDonald received this award on behalf of LUSD and stated, “Schools are the heart of our community, and ensuring our community partners are an active part of our decision making improves our services to kids. I am honored to accept this award on behalf of the dedicated LUSD staff who work tirelessly to make this happen.”
