*Rev. 2015*

## **618 ASSESSMENT OF STUDENT ACHIEVEMENT**

### **I. PURPOSE**

The purpose of this policy is to institute a process for the establishment and revision of assessments to be used to determine how well students have achieved Graduation Standards.

### **II. GENERAL STATEMENT OF POLICY**

The school district has established a procedure by which students shall complete the Graduation Standards. This procedure includes the adoption of performance assessment methods to be used in measuring student performance. The school district strives to continually enhance student achievement of the Graduation Standards.

### **III. DEFINITIONS**

- A. “Academic Standards” are the Minnesota Academic Standards in the subject areas of language arts, mathematics, science, social studies, physical education and the arts.
- B. “Benchmark” means the academic knowledge and skills students must achieve at each grade level or high school level to satisfactorily complete a state Academic Standard.
- C. “Elective standards” are the academic standards adopted by the school district in the subject areas of health; vocational and technical education; and world languages.

### **IV. ESTABLISHMENT OF CRITERIA FOR ASSESSMENT**

- A. The District shall establish criteria by which student performance of the Minnesota Graduation Standards and elective standards are to be evaluated and approved.
- B. The superintendent shall ensure that students and parents or guardians are provided with notice of the process by which program Academic Standards will be assessed.
- C. Staff members will be expected to utilize staff development opportunities to the extent necessary to ensure effective implementation and continued improvement of the implementation at all levels of the Minnesota Academic Standards.

## V. STANDARDS FOR MINNESOTA ACADEMIC STANDARDS PERFORMANCE ASSESSMENTS

### A. Benchmarks

The school district will offer academic knowledge and skills to allow students to satisfactorily complete a state standard by the use of grade level or high school level benchmarks. These benchmarks will be used by the school district and its staff in developing tests to measure student academic knowledge and skills.

### B. Local Assessments

Locally selected assessments are expected to provide opportunities for students to demonstrate their achievement of the elective standards or other locally adopted standards.

### C. Statewide Academic Standards Testing

1. The school district will utilize state constructed tests developed from and aligned with the state's required academic standards as these tests become available. If a state assessment is not available, the school district will determine if a student has met the required academic standards through locally developed assessments.
2. The school district will administer annually, in accordance with the process determined by MDE, the state accountability tests to all students in grades three through eight and at the high school level as follows:
  - a. language arts and mathematic assessments in grades three through eight and at the high school level; and
  - b. science assessments in one grade in the grades three through five span, the grades six through nine span, and a life assessment in the grades nine through twelve span.
3. The school district will develop and administer locally constructed tests in social studies, health and physical education, and the arts to determine if a student has met the required academic standards in these areas.
4. Students for whom the statewide or locally constructed tests are inappropriate, as determined by the student's individualized education program team, or students with limited English proficiency, shall be exempt from or provided appropriate, technically sound accommodations or alternate assessments for statewide and local testing with the approval of the student's parent or guardian.
5. The school district may use a student's performance on a statewide assessment as one of the multiple criteria to determine grade promotion or retention. The school district also may use a high school student's performance on a statewide assessment as a percentage of the student's final grade in a course, or place a student's assessment score on the student's transcript.

D. Rigorous Course of Study Waiver

1. Upon receiving a student’s application signed by the student’s parent or guardian, the school district must declare that a student meets or exceeds a specific academic standard required for graduation if the school board determines that the student:
  - a. is participating in a course of study, including an advanced placement or international baccalaureate course or program; a learning opportunity outside the curriculum of the school district; or an approved preparatory program for employment or postsecondary education that is equally or more rigorous than the corresponding state or local academic standard required by the school district;
  - b. would be precluded from participating in the rigorous course of study, learning opportunity, or preparatory employment or postsecondary education program if the student were required to achieve the academic standard to be waived; and
  - c. satisfactorily completes the requirements for the rigorous course of study, learning opportunity, or preparatory employment or postsecondary education program.
2. The school board also may formally determine other circumstances in which to declare that a student meets or exceeds a specific academic standard that the site requires for graduation under this section.
3. A student who satisfactorily completes a postsecondary enrollment options course or program or an advanced placement or international baccalaureate course or program is not required to complete other requirements of the academic standards corresponding to that specific rigorous course of study.
