HOLLY STREET CAMPUS CREEK BANK REPAIRS

PROJECT ACTIVITIES:

• In Spring 2020 the rising waters of Issaquah Creek eroded a portion of the creek bank and undermining of the parking lot at the Holly Street Campus site.

• The Capital Projects Team started the very complex design and permitting for repair work within a salmon/fish bearing stream and approximately ½ mile downstream of a fish hatchery.

• Due to permitting complexities the permitting process was split up into 2 parts; temporary and permanent. The temporary work was completed in Spring 2021 and the permanent work is scheduled to be completed within “the fish window” which is July-August 2022.

• Heavier than normal rain events in January and February have led to additional damage to the creek bank.
