

EXPRESS SCRIPTS®

Express Scripts' SaveonSP Covers More Drugs, Effective on July 1, 2020

Dear Valued Client:

Specialty drugs have fantastic potential to cure and treat life-threatening illnesses, but they can be costly to both you and your members. To help contain these high costs, you have enrolled in Express Scripts' **SaveonSP** program, which allows your plan and members to access all available funds for expensive specialty medications.

Periodically, SaveonSP may modify or expand its list. SaveonSP will be expanding its covered drug list.

What Does This Mean for You?

No action is required. Starting **July 1, 2020**, SaveonSP will automatically include 41 additional specialty medications.

What Does This Mean for Your Members?

SaveonSP will call any member who is prescribed any of the new medications. The SaveonSP representative will walk the member through the process, answer any questions, and enroll them in the appropriate manufacturer coupon program. Once registered, the member will be able to fill their prescription for \$0 with no accumulator impact.

Should you have any questions, please do not hesitate to contact a member of your account team. As always, we appreciate the opportunity to partner with you.

Sincerely,
Your RxBenefits Team
