

COVID-19

## **KINDERGARTEN OR ELEMENTARY SCHOOL: WHAT HAPPENS IF A STUDENT HAS CONTACT WITH A STUDENT SICK WITH COVID-19? (STUDENT IN THE SAME CLASS OR CONTACT AT RISK\*)**

**Continuation of face-to-face learning and completion of a self-test on D+2\*\*.  
Wearing a mask indoors is strongly recommended for contact cases.  
(from CP) for 7 days after the occurrence of the confirmed case.**

### **If the self-test\*\*\* is negative**

- **No isolation**  
Continuation of face-to-face courses

### **If the self-test is positive**

- **Student becomes a confirmed case**  
• **Isolation of 7 days which can be reduced to 5 days**  
if an antigen or PCR test performed  
on day 5 is negative and no symptoms for  
48 hours

**Students infected with Covid-19 less than 2 months ago** can continue face-to-face lessons without taking a test, unless symptoms appear.

**If a new case appears within less than 7 days,**  
it is not necessary to carry out a new screening.

**Legal representatives are given the self-test free of charge in pharmacies**  
upon presentation of the letter sent by the school.

\* Close contact with a confirmed case, without one of the two people wearing a mask providing filtration greater than 90%

\*\* 2 days after the last contact with the confirmed case or the day of the information if the contact took place for more than 2 days

\*\*\* Monitoring can also be done by an antigenic test or, failing that, PCR (in the latter case, the result must be obtained before classes resume)
