Established in 1998, Westminster School at Oak Mountain is a K-12 classical Christian school. We are committed to graduating young men and women who think with discernment and understanding, who reason persuasively and articulate precisely, and who interpret the world through the lens of Scripture. Our school is designed to develop well-rounded, renaissance students, who are scientists as well as linguists, athletes as well as poets.

CORE CHARACTERISTICS

CHRISTIAN Our teachers seek to build Christ's kingdom by equipping students with wisdom, virtue, and eloquence.

CLASSICAL Westminster provides a rigorous, traditional liberal arts education. The core disciplines taught in the Upper School are classical languages, the Great Books, natural sciences, and the history of civilizations from earliest origins to the present. Courses in Humane Letters are taught as Socratic seminars. Formal logic and rhetoric are integrated into the curriculum, but are taught in their own distinct courses as well.

COMMUNITY Westminster is committed to a healthy community of faith and learning. All students in grades 7-12 are assigned to one of eight houses. These houses serve as the basis for community-building, competition, service, and student government. Each student has a faculty advisor who acts as a mentor, both academically and spiritually.

GRAND TOUR Our Grand Tour provides an experiential culmination of twelve years of study for our graduates. They travel for ten days visiting noteworthy historical sites relevant to their coursework. This immersive trip gives them a ground-level view of the foundations of the modern Western world.

AFFILIATIONS Westminster is a ministry of Oak Mountain Presbyterian Church, PCA, and is accredited by Cognia (formally known as AdvancED). The school holds membership in the Association of Christian Classical School (ACCS), Classical Association of Middle West and South (CAMWS), the National Association for College Admission Counseling (NACAC), the National Association of Secondary School Principals (NASSP), the Education Records Bureau (ERB), the Society for Classical Learning (SCL), the National Junior Classical League (NJCL), the Educational Theatre Association (ETA), and the Alabama High School Athletic Association (AHSAA).

ORGANIZATIONS Westminster's extracurricular activities are designed to enrich study, learning and culture. Current clubs include theater, choral ensemble, National Honor Society, robotics, yearbook, video production, chess, and art club.

ATHLETICS Westminster offers a variety of co-curricular sports to strengthen students spiritually and athletically. These include volleyball, cross-country, basketball, swim & dive, indoor track & field, outdoor track & field, soccer, golf, tennis and baseball. Most of these programs compete in the AHSAA 2A classification, although several have moved higher based on their success under the AHSAA reclassification rule.

HUMANITIES Humanities courses at Westminster cover texts ranging from Homer's *Odyssey* to Shakespeare's *Hamlet*. Classes emphasize a conversational methodology, in which the primary object is not victory over an opponent, but the discovery of truth. At Westminster we believe that the art of discussion, like reading or writing, is a skill that must be honed and refined.

RHETORIC Rhetoric is a foundational subject reinforced throughout students' Upper School experience. Because the value of these skills goes beyond academic pursuits, students practice and apply it to other forms of communication. Their studies culminate in a thesis experience that is not merely an exercise but a capstone of academic progress, spiritual and moral development, life skills, and natural aptitudes and interests.

FINE ARTS Fine Arts courses include visual art, music, and theater and cover artistic movements from ancient to modern as they relate to the Humanities curriculum. The classes are designed to give students experiences in creating work based on the practices of various periods and artistic movements. Students are exposed to artistic elements and given opportunities to express themselves in a variety of forms. Students of the Fine Arts realize the integration of all art forms in the development of mankind and culture throughout the curriculum.
