

In Read Naturally, the student reads a high-interest, nonfiction story until able to read it accurately and with expression at a goal rate. Read Naturally combines the three powerful, research-proven reading intervention strategies to create an effective tool that individualizes instruction and improves reading proficiency. Using audio support and tracking their progress, students work with high-interest material at their skill level to improve fluency, vocabulary, and comprehension.

**Teacher Modeling:** The student reads along while listening to a carefully-paced recording of a fluent reader. Teacher modeling helps a student learn new words and master others as well as learn proper pronunciation, expression, and phrasing.

**Repeated Reading:** A student reads the story multiple times. Repeated reading helps a student master difficult words, increase accuracy, and improve expression to become a fluent reader. Reading a story repeatedly also increases comprehension and builds confidence.

**Progress Monitoring:** The student uses graphs to track his or her performance. Progress monitoring involves the student in the learning process, motivates the student to improve, and increases reading achievement.
