

Read Naturally GATE accelerates reading achievement by combining the research-proven strategies of teacher modeling, repeated reading, and progress monitoring to teach phonics, develop fluency, and provide support for phonemic awareness, comprehension, and vocabulary. Teachers present scripted phonics tutoring lessons and lessons for other foundational skills. Students respond as they interact with letters, key words, and stories in the teacher's guide/display book. As the group works through the steps, the students master letter sounds, decodable words, high-frequency words, and a nonfiction story. Students track progress on their graphs.
