

Honor Roll Calculation

Honor roll is based on percentage points average (PPA) of a student's 9 week grades received from all classes. There are three categories to the middle/high school honor roll. The categories and criteria are listed below:

Highest Honors	PPA - 97%-100%.	No individual grades below 90%
High Honors	PPA- 94%-96%.	No individual grades below 85%
Honors	PPA- 90%-93%.	No individual grades below 80%

PPA Calculation: The percentage grade times the course credit value. Then divide the total percentage grades by the total credits

Ex. A full year course (ELA, Social Studies etc.) is worth 1 credit

A 9 weeks course (Steam, Art, Wellness etc.) is worth .25 credit because of only having the course for one 9 weeks ($1/4 = .25$) A semester course would be .50

Ex. Student schedule:

ELA	1 credit	9 weeks grade of 85	(1 X 85=85)	85
Math	1 credit	9 weeks grade of 97	(1 X 97=97)	+ 97
Science	1 credit	9 weeks grade of 81	(1 X 81=81)	+ 81
Art	.25 credit	9 weeks grade of 98	(.25 X 98=24.5)	+ 24.5
Totals	3.25 credits		9 weeks total	287.5

The 9 weeks PPA is calculated by dividing the 9 weeks total by total number of credits

$$287.5/3.25 \text{ PPA} = 88.46$$
