TOA: Ryan DeAustin

K-6 ELA Specialist: Shelly Edgar

McKinney Vento/COA: Tammy Hall

District SEL Specialist: Jon Bowen

SPED Director: Linda Taylor

I. Welcome and Thank you

The meeting began at 4:02 pm with Michelle welcoming everyone to the committee.

II. Agenda

Michelle went over the Agenda. She recapped the committee's vision, outcomes, and meeting norms.

III. Areas of Focus

Michelle provided the final list of comments from the community survey with committee members. The survey ended up with a total of 1,528 responses from the community.

The committee reviewed the community response survey activity they had completed at the prior meeting. Michelle had typed up the committee's feedback they had given from the comment activity at the last meeting. She provided a chart with information retrieved from the survey and committee that demonstrated the final results from the Committee versus the Community Survey. The graph showed the top 5 topics from the community survey and the top 5 from the committee survey. The top five matched with a couple of changes on the order of importance.

Michelle used chart paper with a topic on each piece of chart paper. She wrote down on one side of the chart paper what was already being done in district to address each topic. Then she went over each topic and gave the committee an opportunity to give suggestions. Jon Bowen spoke on SEL suggestions. Lori Berman had the opportunity to speak on the air filtration topic. There was a lot of dialogue within the committee and additional information was added to the topics on the chart paper.

Once all voices were heard, Michelle asked the committee if they felt if they needed to meet again to further discuss topics or if everybody was in agreement with our top five choices to present to cabinet. Census across the room was there was no need for another meeting. She let them know that she would send out an email with a survey attached to them to confirm the approval of the recommendations.

Meeting adjourned at 5:20 pm
