

CONCEPT AND RULES IN NEW CONSTRUCTION

Providing the proper school plant facilities is a major responsibility of the Board of Trustees and the district administration. The design of the school plant, adequacy of space, and flexibility of use all combine to inhibit or enhance the instructional program.

Since school construction is costly, and buildings when constructed become a permanent part of the community to be used by large numbers of people, great care must be taken to make certain that the facilities will fully support the intended educational community programs.
