Special Diet Order Form

(Medical Statement for Students with Special Nutritional Needs)

Dear Parent or Guardian:

If your student has a food allergy, intolerance, sensitivity, restriction, texture modification or other dietary need, it is REQUIRED that we have a completed Special Diet Order Form (Medical Statement for Students with Special Nutritional Needs for School Meals)

The completed form is REQUIRED to take action regarding any medical needs, including menu modification, substitutions or omissions.

The school staff cannot change food textures, make food substitutions, restrict a food item on the menu, or alter your child's diet at school without all the information filled in on this form.

PLEASE NOTE: You are REQUIRED to provide Breakfast and Lunch from home until this diet order is processed. Please allow 10 days from the time the completed form is submitted to MGSD to process the diet order. Please continue to provide meals from home during the processing time.

Please contact the School Nutrition Office with any questions regarding this policy or if you need assistance with the Special Diet Order Form at 704-658-2639.

Guidance for Completing the Medical Statement for Students with Special Nutritional Needs for School Meals

Parent/Guardian:

The *Medical Statement for Students with Special Nutritional Needs for School Meals* helps schools provide meal modifications for students who require them. Completion of all items will allow your child's school to create a plan with you for providing safe, appropriate meals to your child while at school.

Your participation in this process is very important. The sooner you provide this signed and completed form to your child's school, the sooner the School Nutrition Program or school staff can prepare the food your child requires. Your signature is required for your school to take action on the medical statement. The school staff cannot change food textures, make food substitutions, or alter your child's diet at school without all the information filled in on this form.

Please follow the steps below to get started:

1) Complete all items of **PART A** of the Medical Statement.
2) Take the Medical Statement to your child's pediatrician or family doctor and have him/her complete **PART B**.
3) Return the properly signed Medical Statement to your child's teacher, principal, nurse, Special Education case manager, or Section 504 case manager, School Nutrition Administrator, or the school staff person who gave you the blank form.
4) Ask the school when a team, including you and the school system's School Nutrition Administrator, will meet to consider the information provided on the form. You may invite people from the community who are knowledgeable about your child's feeding and nutrition issues to the meeting. These would be people who could help school staff design a school mealtime plan for your child, like your child's pediatrician, nurse, speech-language pathologist, occupational therapist, registered dietitian or personal care aide.

Physicians and Medical Authorities:

This form helps schools provide meal modifications for students who require them. Completion of all items will streamline efficient care of the student.

The school cannot change food textures, make food substitutions, or alter a student's diet at school without a proper statement from you. Meal modifications are implemented based on medical assessment and treatment planning and must be ordered by a licensed physician or recognized medical authority.

Please consider the following as you complete **PART B** of the Medical Statement:

1) Complete all items of **PART B**. *(Note: A licensed physician's signature is required for students with a disability. For students without a disability, a licensed physician or recognized medical authority must sign the form. Recognized medical authorities include physicians, physician assistants, and nurse practitioners.)*
2) Be as specific as possible about the nature of the child's disability and life activities that the disability limits. In the case of food allergy, **please indicate if the student's condition is a food intolerance, an allergy that would affect performance and participation at school (e.g., severe rash, swelling, and discomfort), or a life-threatening allergy (e.g., anaphylactic shock).**
3) If your assessment of the child does not yield sufficient data to make a determination about food substitutions, consistency modifications, or other dietary restrictions, please refer the child/family to the appropriate feeding, nutrition, or allergy specialists for completion of the Medical Statement. Schools do not routinely have instrumentation and/or staff trained for a comprehensive nutrition and feeding assessment and must partner with community providers to meet a student's special feeding and nutrition needs.
4) Attach any previous and/or existing feeding/nutrition evaluations, care plans, or other pertinent documentation housed in the student's medical records to the Medical Statement for parent/guardian delivery to the school.
5) Consider being available to consult with the child's school team as it implements the feeding/nutrition care plan.
