Mrs. Monty's Class Field Trip to ECC

5th Grade Class Reflections

My favorite part of our field trip to the ECC was when we got to do the **Trusted Adults** hands with our kindergarten buddies. It was so much fun to teach them about how they have their **Trusted Adults** if they need help online. It was also cool to see what they learned from the video, and I could tell they did learn a lot by what their answers to our questions were. (Baylor)

The most valuable part of our field trip to the ECC was getting to teach our kindergarten buddies about online safety. Since we have learned so much about online safety, we were able to pass that on to our kindergarten buddies which was really special. (McKenna)

To me, the most valuable part of our field trip to the ECC was making a poster for them. I believe this because while I was talking to my buddies, I figured out all of them have devices. I believe that since the poster will always be in their room, they will know who to talk to if they come across something online. (Anvi)

The most valuable part of the field trip for me was doing the **Trusted Adult** hand activity. (This was also what I enjoyed most at the ECC.) I was able to engage and talk to our kindergarten buddies about the activity and simply ask them questions about what they do at the ECC. It was also fun helping them trace their hands, write their adults on the fingers, and it was fun letting them customize their hands. (Violet)

To me, the most valuable part of our field trip to the ECC was everything. I enjoyed seeing all of their happy little faces, seeing my buddy Jwana, and seeing how attentive they all were. (Sophia)

I think the best part of our field trip to the ECC for me was buddying up and doing the activities with our kindergarten buddies. Also, seeing my brother in PreK-3 before we left meant a lot to me. (Jason)

To me, the most valuable part of our field trip to the ECC was teaching them about their **Trusted Adults**. When I was working with my kindergarten buddies they needed to know more about what a **Trusted Adult** is. (Evan)

To me, the most valuable part of our field trip to the ECC to teach our kindergarten buddies about online safety was when they were attentive listeners to the video. It was important to me because they were interested in our Exhibition topic. (Zyre)

The most valuable part of being with our kindergarten buddies was how much they understood the video and how much they enjoyed it. They paid so much attention and

got all of our questions about online safety right. They really did cooperate and were so interested in learning more. I really liked how interested they were in learning more about online safety. I loved the field trip to the ECC, and I hope they learned a lot. (Dev)

I loved seeing how excited our kindergarten buddies were when they watched the video and saw the characters they knew while learning about online safety. (Morgan)

To me, the most valuable part of our field trip to the ECC to teach our kindergarten buddies about online safety was how attentive and cooperative they were. It surprised me so much and made it a lot more fun. The field trip also made it a lot clearer to me how important it is for kindergarten students to know about online safety and how fun they are to work with. (Collins)

The most valuable part of our field trip to the ECC was spending time with our kindergarten buddies. It was super spectacular to see how much our kindergarten buddies learned after watching the video and our class asking them questions. It felt amazing. Also, the answers for their **Trusted Adults** were so good. I was impressed with all of their answers. (Saisha)

The most valuable thing about our field trip to the ECC, in my opinion, was partnering with one of our kindergarten buddies, Luke. I feel that he cooperated so well and had an amazing personality. I enjoyed going to the ECC to visit other Patriots. (Cort)

To me, the most important part was making sure that our kindergarten buddies understood what we taught them about online safety. I also wanted them to have fun. I was very happy when our kindergarten buddies got the answers correct to our questions about online safety. (Maaz)

Kindergarten Teacher Reflections

Thank you for bringing your class in today to share their knowledge with our students. It was so much fun to hear my students answer all of the questions! The best part was watching the interactions between the students and how caring your 5th graders were. (Ms. Knoke)

Thank you for coming today! The kids loved it and learned a lot. (Ms. Krig)

Thank you so much for sharing your class with us!!! (Mrs. Wright)

It was awesome thank you for sharing with us! (Mrs. Piazza)
