Substitute teacher Mrs. Lori Carrender, taught the 4th grade science class: "What are Magnets attracted to?". The kids had a great time with it!

The SES 5th grade students did an amazing job representing the **Living History Museum on Tuesday**. All throughout the day, these students educated the students from the lower grades about the person they represented and that continued during the evening with all parents. The evening was concluded with an amazing and special choir performance. We want to thank all the parents that supported their children in this program and who came out to show their support during the event.

Third grade has been working on a creative way to learn about fractions... through pizza creation. They want to **thank Eubank Pizza** for the donation of pizza boxes for the whole grade!!!

Parents, please don't forget about our Board and Card game collection.... We are trying to collect enough games so that classroom can borrow boardgames during monthly pow wow's, indoor recess, etc. Attached is a flyer with info.

The monthly Grandparent Support group meeting is Monday, March 28 @ noon at the Pulaski Co. Public Library.

The vision for Southern Elementary students is that every student is proficient and prepared for success by becoming college and career ready.
