ACT Focus

 **Tip of the Week**: 25 ACT Math Concepts You Need to Know

21. A ratio expresses a mathematical comparison between two quantities. ($\frac{1}{4}$ or 1:4)
22. A proportion is an equation involving two ratios. ($\frac{1}{4} = x/8$ or $1:4 = x:8$)
23. When multiplying exponential expressions with the same base, add the exponents.
24. When dividing exponential expressions with the same base, subtract the exponents.
25. When raising one power to another power, multiply the exponents.

SCHOLARSHIP Update

May 1, 2022 is quickly approaching. This is the deadline for seniors to have all things A+ related turned in to Mrs. Liszewski. If you or your student have a question in regards to their A+ eligibility, please email mliszewski@stdominichs.org.

Alumni Spotlight

Colin Dolan '14

University of Missouri | Biological Sciences

Colin Dolan is a 2014 graduate of St. Dominic High School where he was a very involved in various clubs and athletics including Football, Peer Ministry, Student Council and National Honor Society. As a high school student, Colin always had a love for science and that passion helped him focus on his college and career opportunities in the field.

"I always loved science and thought about doing many different things like becoming a teacher, veterinarian and eventually landed on becoming a doctor. I love the chance to work with patients and help them overcome difficult times and improve their lives in a positive way. I also love working with kids as their fun attitudes make every day more enjoyable so Pediatrics was the perfect field for me."

After high school, Colin pursued his degree in Biological Sciences, graduating from the University of Missouri-Columbia (Mizzou) with his Bachelors in 2018. Next month, he will earn his M.D. from St. Louis University and begin his residency at St. Louis Children's Hospital in July. Colin offers the following advice to current students wanting to pursue a career path in Medicine.

"I would tell myself to never lose track of yourself in the process and always find time, no matter how small it may seem, to connect with friends and family along the way. Medicine can be a busy and exhausting field but sharing that journey with the loved ones who have supported you along the way keeps you energized and reminds you how important the work is."

Weekly Wellness

Amy Bauer | Wellness Counselor
abauer@stdominichs.org

The most important reason teens should not have their phones at night.

The research is clear: When teenagers have screens in their bedroom, it interferes with their sleep. A study in the journal of the American Medical Association found that children ages 6 to 18 had an 88 percent higher risk of not sleeping enough when devices were in the bedroom and a 53 percent higher risk of getting a bad night's sleep when devices were in the bedroom just three nights a week.

The (AAP) found that sleeping with a cell phone next to you is worse than falling asleep with the TV on. Phones are addictive enough without having access to them 24 hours a day. Research shows that small breaks from screens can help to alleviate anxiety.

Create a contract with your teen regarding cell phone use.
