Name	Comment
Fritzi Werner	Arts in local elementary, middle and high schools
David A Powers	There is ample research that shows that Arts Curriculum is a proven winner in building student performance in Math and Science: , teaching creative problem solving; using visual techniques to demonstrate solutions and tell stories; greater participation and attendance in school, as well as science fairs and other extra-curricular activities.
	Arts in the classroom improve analytical thinking. Asking questions such as What Do You Think is Going on in this piece of art & what do you see that makes you say that are critical to this thinking.
Carol Lachey	As a volunteer docent at the Laguna Art Museum I would like to stress to the Board the importance of art as an integral part of school curriculum. Children who are given the opportunity to express themselves artistically are naturally more inclined to succeed in other academic areas. Consistent exposure to arts and creative endeavors will only enhance the educational experience for all students. Please consider increasing the schools focus in the area of the arts.
Mary Lee Gair	The Arts (all genre) in school education are a vital need for children of all ages.

Anonymous	May we have more information about the Integrated Science 3 class?
Fritzi Werner	Please include soul-nourishing arts
Dianne Marchese	Art is a fundamental way to stimulate students' imagination & creativity that enhance their science & math abilities as well as critical thinking in all areas. I am a 35 year retired State teacher!!! Art is a must subject in all grades as well as teaching history of the world & cultures. A total awareness of life past, present & future!
