Conclusions

| TEKS Resources only covers core classes. Lack of curricular support/understanding of non-tested subject areas. Need to focus support, understanding, and documentation for these classes. |
| Technology focusing on big ticket items, such as SIS, (PowerSchool & Skyward), Webpage design, training on how to pull information into Excel and manipulate data. |
| Teacher's wanting more training in special populations. |
| Thoughts; How will this plan impact our systems, campuses, and classroom? What are some ways this process will be replicated when working on your CIPs? |
