## Discussion

Gap-that exist between where the school is and where we want to be. Victoria Bernhardt group take a ways – Intersecting data to get a more in-depth perspective, look at all intersections of data, not just the middle, understanding WHY of the performance, focus on the process not just the results, understanding the interaction of 2 things,

Gap Analysis Tool – Hispanic population a 1/3 of ELL and continues to grow, COVID impact; missing vocabulary, 21-22 has been more difficult than 20-21, horizontal alignment/Rti positive for the district, consider a vertical alignment as well.

## Conclusions

Note any data needed for your group
Horizontal alignment and Vertical alignment
Analysis intersecting data and understanding the WHY
