

STUDENT SCHOOL BOARD REPRESENTATION

1. The Board of Education supports the concept of student representation on the Board. These representatives serve as non-voting members, although their "vote" by a show of hands or roll call vote is encouraged and documented in formal minutes on each action item at Board meetings.
2. Student representatives attend business and workshop meetings and are assigned to and participate on a standing committee. They are excluded from executive sessions. The Student Representative to the Board of Education has a variety of important roles and responsibilities, including the discretion and ability to represent the views of students on matters of concern to students; encouraging the involvement of students in educational affairs; outreach to students to provide information and receive input about proposed actions by the Board or the District; as time allows, participating in other events attended by Board members; and being an articulate voice to the public on matters of concern to students.
3. There are two student representatives from the high school, one (1) a member of the Junior class, serving a two (2) year term; and one (1) from the Senior class serving a one (1) year term. For the student representatives, a year runs from June 1 to May 31. The Board Chair assigns the Junior student representative to a standing committee in June.
4. When performing their duties as a Student Representative, it is not expected that the Student Representative will communicate or represent members of the general public or parents of students.
5. Process and procedures for nomination and election onto the Board are outlined in BBAB-R.
