

REFERRAL AND GENERAL EDUCATION INTERVENTIONS

It shall be the policy of the School Department to refer all school-age students suspected of having a disability that requires special education to the IEP (Individual Education Plan) Team for an evaluation in all suspected areas of disability. Referrals of students to the IEP team may be made by parents at any time, and by professional school staff regardless of the results of the initial child find activities, but after completion of the general education process. Other individuals or agency representatives (including representatives of the Department of Health and Human Services) with knowledge of the child may also make referrals. Any such referral should be made in accordance with procedures that may be approved by the Superintendent of Schools.

Regardless of the source of the referral, a referral will be considered received by the School Department on the date that the written referral is received by the office of the Director of Special Education. It shall be signed and dated by Director of Special Education or designee, thereby indicating the date of the receipt of that referral.

The Superintendent, in consultation with the Director of Special Education, may develop procedures for referral and the use of general education interventions within the local School Department, and may from time to time amend those procedures as necessary.
