TEACHING CHILDREN ABOUT DISABILITIES

What's in this month's issue:

- TEACHING CHILDREN ABOUT DISABILITIES
- SEL FEATURED TOPIC: WHAT FAIR ISN'T ALWAYS EQUAL
- TRY IT AT HOME! RESOURCE HIGHLIGHT: MEDICAL ACCESS

A significant part of creating an inclusive school environment is teaching children to understand and accept differences, including disabilities. Disability education reduces bullying, encourages empathy, and is an important part of children's social development. But how can parents and educators best help children to understand disabilities?

Even young children notice physical differences, and being receptive to their observations and questions normalizes their experiences and provides an opportunity to talk about what is the same and different about people. Having early conversations about the disabilities that children observe sets the stage for later conversations about less "visible" developmental and learning disabilities.

Here are some tips for talking with kids about disabilities:

- **Learn about disabilities together.** Age-appropriate books and kid-friendly websites about disabilities can facilitate conversations and teach kids that it is OK to ask questions about disabilities.
- **Answer children's questions openly and honestly,** using matter-of-fact explanations and focusing not only on differences but also on similarities between people.
- **Explain** that some people are born with disabilities and others develop disabilities later in life, and that a physical disability does not mean that someone also has a cognitive disability.
- **Avoid using the word "normal" to describe people without disabilities,** and teach kids correct terminology to describe a disability, using "person-first" language (see below).
- **Recognize that terminology about disabilities has changed over the years;** check out this chart, ["Words Matter: A Guide to Disability Language Etiquette"](#)
- **Teach kids to ask, "Is there anything I can do to help?" before assisting a person with a disability.** Likewise, tell kids not to approach or pet a service animal unless invited to do so.
- **Encourage children to develop friendships with peers who have disabilities,** and model how to treat every person with dignity.

The diagram is a circular model with three concentric layers. The outermost layer, in a light blue ring, lists the environments where learning occurs: COMMUNITIES, FAMILIES & CAREGIVERS, SCHOOLS, and CLASSROOMS. The middle layer, in a darker blue ring, lists the core skills: SELF-AWARENESS, SELF-MANAGEMENT, RESPONSIBLE DECISION-MAKING, RELATIONSHIP SKILLS, and SOCIAL AWARENESS. The innermost layer, in a white circle, lists the foundational elements: 21st Instructional & Classroom Goals, Sustainable Culture, Practices, & Policies, Authentic Partnerships, and Aligned Learning Opportunities.

What is fair and
what is equal?

**Consider using words that focus on the person.
For example, rather than saying:**

SONIA SOTOMAYOR

JUST ASK!

BE DIFFERENT, BE BRAVE, BE YOU

A collage of ten colorful children's books from the 'My First' series. The books are arranged in a grid-like fashion, overlapping slightly. Each book features a different theme and is illustrated with vibrant, cartoonish characters and objects. The titles visible on the books include 'My First Alphabet', 'My First Numbers', 'My First Shapes', 'My First Colors', 'My First Animals', 'My First Plants', 'My First Insects', 'My First Vehicles', 'My First Sports', and 'My First Holidays'. The books are designed to be engaging and educational for young children.
