

TOWN OF SUFFIELD

SUFFIELD SOCIAL SERVICES COMMISSION (SSSC)

The Social Services Commission will their Regular Bi-Monthly Meeting,
Thursday, May 12, 2022 at 8:30 am
Teleconference Call via Zoom

REGULAR BI-MONTHLY MEETING AGENDA

1. Introductions & Roll Call
2. Review and Approve Minutes from the March 10, 2022 Meeting
3. Public Comment – may call in to conference call, not video chat
 - a. <https://us02web.zoom.us/j/88037318196?pwd=U0ZhTVNUNDBVNWcrdThyOUgxVE9Udz09>
Meeting ID: 880 3731 8196
Passcode: 882124
Call in telephone number: 1 301 715 8592 88037318196#
4. Welcome and introductions:
 - a. New member Nate Prusci
 - b. Suffield Housing Authority: Kim Emmons
 - c. Suffield Community Aid: Danielle Annibalini
5. Department Reports
 - a. Suffield Youth Services
 - b. Suffield Community Aid
 - c. Suffield Senior Center
6. Old Business
 - a. Suffield Equity Profile discussion (see attached document and discussion questions)
 - b. Affordable Housing Plan Town Forum May 4th 7:00 (Commission members are encouraged to attend)
 - c. Hartford Foundation Community Development Grant update
<https://www.hfpg.org/donors/ways-to-give/community-funds/suffield>
The following organizations were recipients of inaugural grant awards during August 2021:
 - Connecticut Landmarks (\$4,750)- to support a collaborative exploration of residents' role in the displacement of Native Americans
 - Crossroads Food Pantry (\$405) - to purchase carts for the food pantry
 - Operation Fuel (\$3,000) - to support emergency energy distribution in Suffield
 - Suffield Garden Club, Inc. (\$5,000) - to support developing a phased tree planting plan for Suffield's historic Main Street and greens

7. New Business

- a. Election of Chair and Vice Chair.
- b. Consideration of other sources of Suffield data for setting priorities and action plans
 - Youth Survey Results (first to be considered by the Local Prevention Council, Board of Education and School Administration)
 - Housing Profiles from Partnership for Strong Communities and CT Mirror
 - <https://housingprofiles.pschoosing.org/profile/#Suffield>
<https://ctmirror.org/2022/04/07/new-study-examines-barriers-to-multifamily-housing-in-12-ct-towns/>
 - 2020-2021 North Central Region (Region 4) Priority Report (Amplify)
 - Others?
- c. Meeting Schedule going forward (how often, days and times)
- d. Updated Directory (attached)

8. Adjournment

Respectfully submitted,

Connie Irwin, Recording Secretary

c: Town Clerk
Commission Members
Department Members

Suffield 2021 Equity Profile

The main indicators of health (medically, schools, finances, etc.) look better for Suffield than that of our region and our state. This is the good news! So, we should take a minute to feel good about that. But then, can we look deeper for areas where we would need to be better, more welcoming, more responsive to the needs of our residents who are not doing so well? Where are the needs that are not being met?

How do things look for our youth? What about our senior citizens, people with less than our average income and/or disabilities? What about racial/ethnic diversity?

We might look at how the data reflects disparity of opportunity across race/ethnicity/income levels. Where do you see us in the next 10-20 years if we do nothing differently? What results would we like to see? If they are different than what we would like to see, how might we help our community make changes for the better?

There is more here than we will have to discuss at our upcoming meeting, but if each person could pick out one or two issues that we should address or understand better, that should lead to a great discussion. Robin was good enough to go through the document and identify some potential issues for consideration. (See below)

Page 2 -

20% of Suffield's population (15,752) are people of color. This number includes the prison population in Suffield, so, is not true reflection of the diversity of our community.

Page 3 Table 1: About the Area

23% of Suffield's households are spending at least 30% of total income on housing costs - which means they come up short on medical, food and other necessities, compounding difficulties. This rate is less than for the state and less than for our area (north central CT), but is it where we want to be? What do we know about who these folks are cost burdened? Figure 6 on page 8 gives a racial/ethnic breakdown for our PUMA, but not for Suffield. How are people who have raised their families in Suffield impacted as housing prices and taxes increase? What are options for our seniors? What are options for adult children with special needs?

Suffield's median household income is \$114,208 compared to the state at \$78,444 and our area at \$90,963. Similarly, the Poverty rate of 1% is considerably lower than the state (10%) and our area (6%). What obligations do we have as a community, to provide options for families that earn closer to the median household income for CT (vs. Suffield) or our area? What about people who work in Suffield. Can they afford to live here? When we get to Table 6 on page 11, we should look at the salaries of people who work in Suffield.

Page 4

Table 2, Population by Race/Ethnicity, 2020

The numbers reflected here include the prison population in Suffield. What do we think the real numbers are for the town (excluding the prison population)? Should we be working toward balancing closer to the demographics of the state or our area? If so, what would we need to do

differently to accomplish that? What would we forecast the results to be in 10 years if we make no intentional changes?

Page 6 –

Table 3 - This shows our population has 9.3% fewer kids than in 2010. We expanded all schools during that time. Do we have more capacity in our schools? It also shows our adult population growing by 2.5%.

Table 4 - The chart would indicate a growing Latino population for the state, but not in Suffield. Why do we think that is? Overall, it appears the white population is shrinking. Do we expect that to continue in Suffield? Are there any implications (also remember the prison population is included here)?

Page 7- 89% of households are single-family and 11% are multi-family. In our region, it is 80/20. What would happen if we encouraged more multi-family? What do you think of when you think "multi-family"?

Page 9 – Table 8 shows a higher suspension rate for Latino students than for white or the total population of students? What can be done to understand and address this disparity? Is there a parallel between suspension rates and JRB referrals. If not, why not?

Page 11 – Table 6 shows average annual salaries for Suffield workers are lower than CT is all sectors. Can people who work in Suffield afford to live in Suffield. What is the average salary is for people who work in Suffield? Retail workers, restaurant workers, teachers, police, etc.? What is the average income for our seniors?

Page 13 - Table 7 shows that 186 people in Suffield are living below the poverty level and 151 households are receiving food stamps/SNAP. Do we have all the needed programs to help them? How are we addressing these needs? Could be a question for Suffield Community Aid.

Page 14 - Figure 13 The PUMA region appears to have a growing proportion of more expensive homes being built (Affluent) and a shrinking percentage of homes for middle and low income. Suffield's has drafted an Affordable Housing Plan with the goal of increasing our stock of affordable housing. The public hearing is scheduled for May 4th 7:00 (Board of Selectman meeting). All Social Services Commission members are encouraged to attend.

Page 18 – Mental Health indicators are slightly lower for Suffield than CT or the Greater Hartford area. Overdose deaths have increased significantly from 2010 across CT and the PUMA region. Suffield has recently completed a school survey that addresses mental health and substance use issues for middle and high school students. As soon as the result have been shared with the Board of Education and School Administration, there will be an opportunity to share with the community. Social Services Commission members will be encouraged to attend.

Page 24 - Table 12 – Suffield residents seem to feel more unfairly stopped by police, but feel local government is more responsive and amendable to influence than that of CT overall or the

PUMA region. If we want to change the direction of affordability and equity in Suffield, this indicates we need to do it with support/education/enthusiasm from the Suffield residents.

Compiled by DataHaven in August 2021.

This report is designed to inform local-level efforts to improve community well-being and racial equity. This represents version 1.0 of the DataHaven town equity profile, which DataHaven has published for all 169 towns and several regions of Connecticut. Please contact DataHaven with suggestions for version 2.0 of this report.

ctdatahaven.org

EXECUTIVE SUMMARY

Throughout most of the measures in this report, there are important differences by race/ethnicity and neighborhood that reflect differences in access to resources and other health-related social needs. Wherever possible, data will be presented with racial/ethnic breakdowns. Data for white, Black, Asian, and other populations represent non-Hispanic members of each racial group.

- Suffield is a town of **15,752 residents**, **20 percent** of whom are people of color. The town's population has increased by **0.11 percent** since 2010.
- Of the town's **5,158 households**, **87 percent** are homeowner households.
- **Twenty-three percent** of Suffield's households are cost-burdened, meaning they spend at least 30 percent of their total income on housing costs.
- **Ninety-five percent** of public high school seniors in the Suffield School District graduated within four years in 2019.
- Among the town's adults ages 25 and up, **43 percent** have earned a bachelor's degree or higher.
- Suffield is home to **4,226 jobs**, with the largest share in the Wholesale Trade sector.
- Suffield's average life expectancy is **81 years**.
- **Sixty-one percent** of adults in PUMA 0900300 say they are in excellent or very good health.
- **Eighty-two percent** of adults in PUMA 0900300 are satisfied with their area, and **49 percent** say their local government is responsive to residents' needs.
- In the 2020 presidential election, **87 percent** of registered voters in Suffield voted.
- **Forty-four percent** of adults in PUMA 0900300 report having stores, banks, and other locations in walking distance of their home, and **64 percent** say there are safe sidewalks and crosswalks in their neighborhood.

OVERVIEW

For the purposes of this report, Suffield will be compared to Connecticut as a whole, as well as to the towns in the surrounding Public Use Microdata Area (PUMA) designated by the US Census Bureau with the number 0900300. In addition, data are presented for Greater Hartford where sample sizes are otherwise small.

FIGURE 1: STUDY AREA

PUMA 0900300 is made up of the following towns:

East Granby, East Windsor, Enfield, Granby, Hartland, South Windsor, Suffield, Windsor, and Windsor Locks

Greater Hartford is made up of the following towns:

Andover, Avon, Berlin, Bloomfield, Bolton, Canton, Columbia, Coventry, East Granby, East Hartford, East Windsor, Ellington, Enfield, Farmington, Glastonbury, Granby, Hartford, Hebron, Manchester, Mansfield, Marlborough, New Britain, Newington, Plainville, Rocky Hill, Simsbury, Somers, South Windsor, Southington, Stafford, Suffield, Tolland, Vernon, West Hartford, Wethersfield, Willington, Windsor, and Windsor Locks

TABLE 1: ABOUT THE AREA

Indicator	Connecticut	PUMA 0900300	Suffield
Total population	3,605,944	156,124	15,752
Total households	1,370,746	59,547	5,158
Homeownership rate	66%	80%	87%
Housing cost burden rate	36%	28%	23%
Adults with less than a high school diploma	9%	7%	8%
Median household income	\$78,444	\$90,963	\$114,208
Poverty rate	10%	6%	1%
Life expectancy (years)	80.3	80.3	81.0
Adults w/o health insurance	10%	7%	8%

DEMOGRAPHICS

As of 2020, the population of Suffield is 15,752, including 2,883 children and 12,869 adults. Twenty percent of Suffield's residents are people of color, compared to 37 percent of the residents statewide.

TABLE 2: POPULATION BY RACE/ETHNICITY, 2020

Area	White		Black		Latino		Asian		Native American		Other race/ethnicity	
	Count	Share	Count	Share	Count	Share	Count	Share	Count	Share	Count	Share
Connecticut	2,279,232	63%	360,937	10%	623,293	17%	170,459	5%	6,404	<1%	165,619	5%
PUMA 0900300	108,738	70%	17,069	11%	13,213	8%	9,864	6%	196	<1%	7,044	5%
Suffield	12,583	80%	1,125	7%	1,113	7%	378	2%	<50	N/A	540	3%

As Connecticut's predominantly white Baby Boomers age, younger generations are driving the state's increased racial and ethnic diversity. Black and Latino populations in particular skew much younger than white populations.

FIGURE 2: POPULATION BY RACE/ETHNICITY AND AGE GROUP, 2019

Note: Only groups with at least 50 residents shown.

About 1,189 residents of Suffield, or 8 percent of the population, are foreign-born. The largest number of immigrants living in PUMA 0900300 were born in India, followed by Jamaica and Poland.

Linguistic isolation is characterized as speaking English less than “very well.” People who struggle with English proficiency may have difficulty in school, seeking health care, accessing social services, or finding work in a largely English-speaking community. As of 2019, 480 Suffield residents, or 3 percent of the population age 5 and older, were linguistically isolated. Latinos and Asian Americans are more likely to be linguistically isolated than other racial/ethnic groups.

FIGURE 3: LINGUISTIC ISOLATION BY RACE/ETHNICITY, 2019

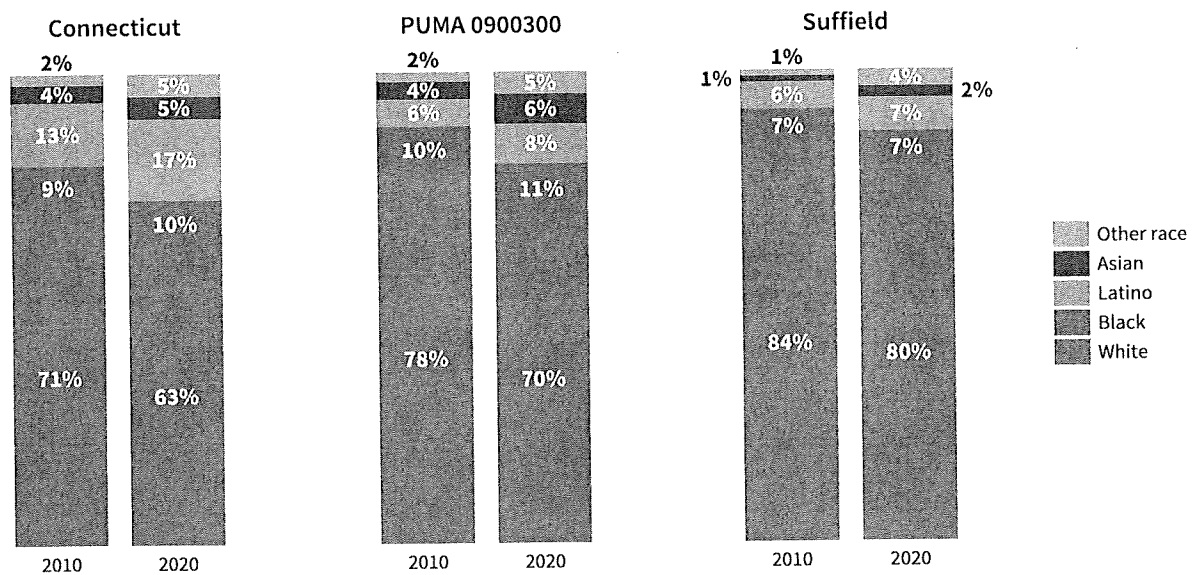

POPULATION CHANGE: 2020 CENSUS

The first set of data from the 2020 Census was released in August 2021, containing basic population counts by age and race/ethnicity. Between 2010 and 2020, Connecticut's population was nearly stagnant. During the same period, Suffield grew by 17 people, a less than 1 percent increase. The number of white residents in Suffield shrank by 5.2 percent, while the non-white population grew by 29 percent.

TABLE 3: POPULATION AND POPULATION CHANGE BY AGE GROUP, 2010–2020

Area	Age	Population, 2010	Population, 2020	Change	Percent change
Connecticut	All ages	3,574,097	3,605,944	+31,847	+0.9%
	Children	817,015	736,717	−80,298	−9.8%
	Adults	2,757,082	2,869,227	+112,145	+4.1%
PUMA 0900300	All ages	157,346	156,124	−1,222	−0.8%
	Children	33,763	30,232	−3,531	−10.5%
	Adults	123,583	125,892	+2,309	+1.9%
Suffield	All ages	15,735	15,752	+17	+0.1%
	Children	3,177	2,883	−294	−9.3%
	Adults	12,558	12,869	+311	+2.5%

FIGURE 4: SHARE OF POPULATION BY RACE/ETHNICITY, 2010–2020

HOUSING

Suffield has 5,158 households, of which 87 percent are homeowner households. Of Suffield's 5,601 housing units, 89 percent are single-family and 11 percent are multifamily, compared to PUMA 0900300, where 80 percent are single-family and 20 percent are multifamily.

Homeownership rates vary by race/ethnicity. Purchasing a home is more attainable for advantaged groups because the process of purchasing a home has a long history of racially discriminatory practices that continue to restrict access to homeownership today. This challenge, coupled with municipal zoning dominated by single-family housing, results in de facto racial and economic segregation seen throughout Connecticut.

TABLE 4: HOMEOWNERSHIP RATE BY RACE/ETHNICITY OF HEAD OF HOUSEHOLD, 2019

Area	Total	White	Black	Latino	Asian	Native American
Connecticut	66%	76%	39%	34%	58%	40%
PUMA 0900300	80%	83%	76%	59%	71%	N/A
Suffield	87%	88%	N/A	68%	96%	N/A

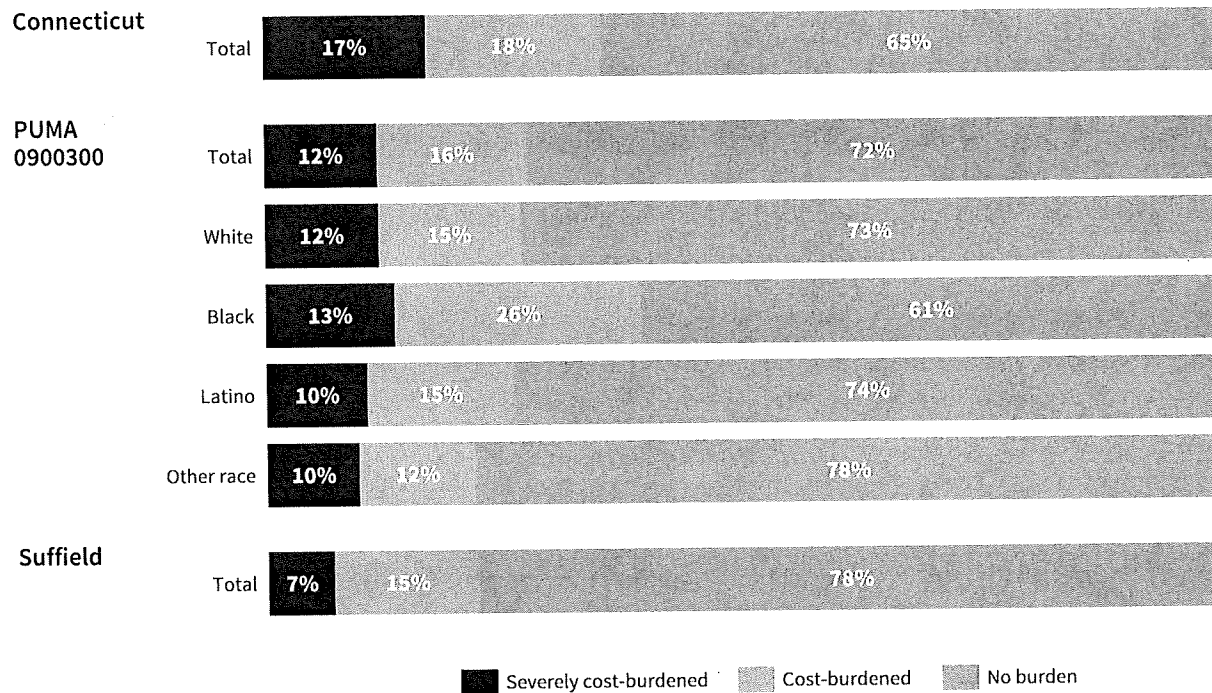

Younger adults are less likely than older adults to own their homes across several race/ethnicity groups. However, in most towns, younger white adults own their homes at rates comparable to or higher than older Black and Latino adults.

FIGURE 5: HOMEOWNERSHIP RATES BY AGE AND RACE/ETHNICITY OF HEAD OF HOUSEHOLD, PUMA 0900300, 2019

A household is cost-burdened when they spend 30 percent or more of their income on housing costs, and severely cost-burdened when they spend half or more of their income on housing costs. Housing costs continue to rise, due in part to municipal zoning measures that limit new construction to very few towns statewide. Meanwhile, wages have largely stagnated, especially among lower-income workers who are more likely to rent. As a result, cost-burden generally affects renters more than homeowners, and has greater impact on Black and Latino householders. Among renter households in Suffield, 44 percent are cost-burdened, compared to 19 percent of owner households.

FIGURE 6: HOUSING COST-BURDEN RATES BY RACE/ETHNICITY, PUMA 0900300, 2019

Household overcrowding is defined as having more than one occupant per room. Overcrowding may increase the spread of illnesses among the household and can be associated with higher levels of stress. Increasing the availability of appropriately-sized affordable units helps to alleviate overcrowding.

TABLE 5: OVERCROWDED HOUSEHOLDS BY RACE/ETHNICITY OF HEAD OF HOUSEHOLD, 2019

Area	Total		White		Black		Latino		Asian		Native American	
	Count	Share	Count	Share	Count	Share	Count	Share	Count	Share	Count	Share
Connecticut	25,541	2%	7,252	<1%	4,437	3%	10,771	6%	2,954	6%	158	4%
PUMA 0900300	570	1%	206	<1%	53	1%	200	8%	123	5%	<50	N/A
Suffield	<50	N/A	<50	N/A	<50	N/A	<50	N/A	<50	N/A	<50	N/A

EDUCATION

Public school students in Suffield are served by the Suffield School District for pre-kindergarten through grade 12. During the 2019–2020 school year, there were 2,127 students enrolled in the Suffield School District. Tracking student success measures is important since disparate academic and disciplinary outcomes are observed as early as preschool and can ultimately affect a person's long-term educational attainment and economic potential.

FIGURE 7: PUBLIC K-12 STUDENT ENROLLMENT BY RACE/ETHNICITY PER 100 STUDENTS, 2019–2020

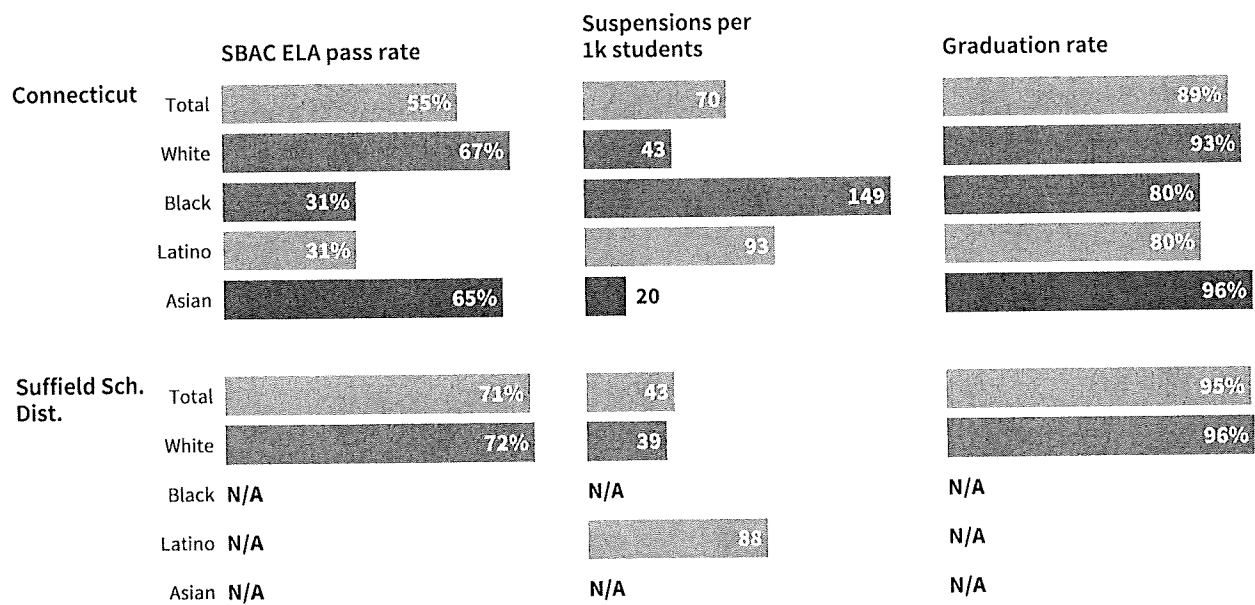

FIGURE 8: SELECTED ACADEMIC AND DISCIPLINARY OUTCOMES BY STUDENT RACE/ETHNICITY, 2018–2019

Adults with high school diplomas or college degrees have more employment options and considerably higher potential earnings, on average, than those who do not finish high school. In Suffield, 8 percent of adults ages 25 and over, or 929 people, lack a high school diploma; statewide, this value is 9 percent.

FIGURE 9: EDUCATIONAL ATTAINMENT BY RACE/ETHNICITY, SHARE OF ADULTS AGES 25 AND UP, 2019

ECONOMY

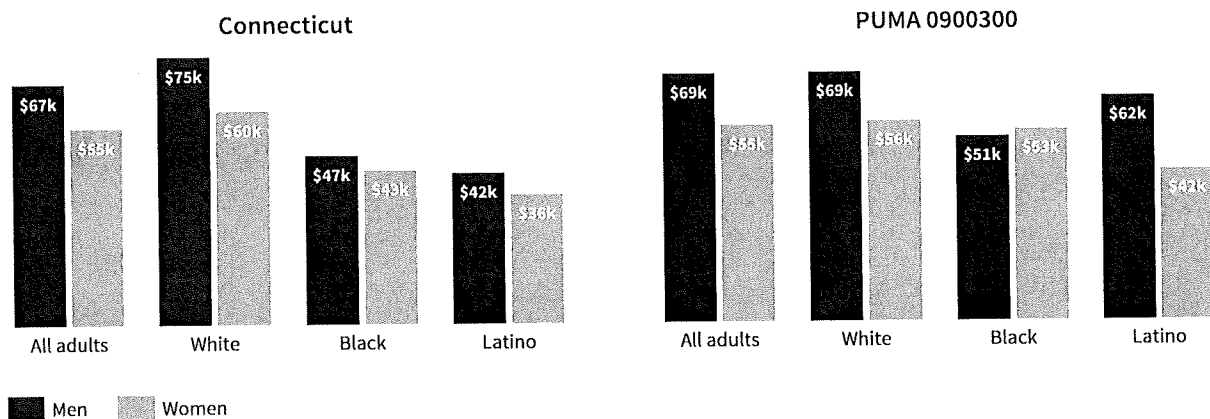

There are 4,226 total jobs in Suffield, with the largest share in the Wholesale Trade sector. While these numbers are from 2019 and do not include economic outcomes related to the COVID-19 pandemic, they describe general labor market strengths and average wages for the area.

TABLE 6: JOBS AND WAGES IN SUFFIELD'S 5 LARGEST SECTORS, 2019

Sector	Connecticut		Suffield	
	Total jobs	Avg annual pay	Total jobs	Avg annual pay
All Sectors	1,670,354	\$69,806	4,226	\$54,039
Wholesale Trade	59,702	\$97,720	589	\$51,645
Health Care and Social Assistance	271,014	\$54,858	480	\$41,134
Manufacturing	161,893	\$85,031	442	\$67,632
Retail Trade	175,532	\$35,833	192	\$35,050
Accommodation and Food Services	129,012	\$23,183	160	\$15,706

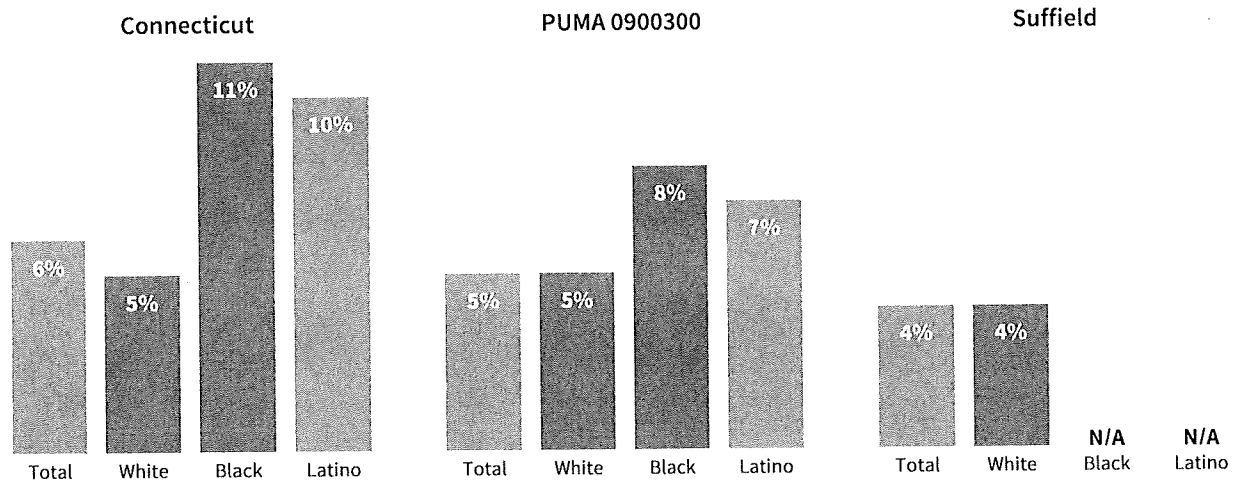

Individual earnings vary by race/ethnicity, sex, and other characteristics. These can be measured comparing the differences in average earnings between groups. White workers and men often out-earn workers of color and women. These trends hold even when controlling for educational attainment.

FIGURE 10: MEDIAN INCOME BY RACE/ETHNICITY AND SEX FOR FULL-TIME WORKERS AGES 25 AND OVER WITH POSITIVE INCOME, 2019

Rates of unemployment also vary by race and ethnicity. Generally, workers of color are more likely to be unemployed due to factors ranging from hiring practices to proximity to available jobs. Overall unemployment in Suffield averaged 4 percent in 2019.

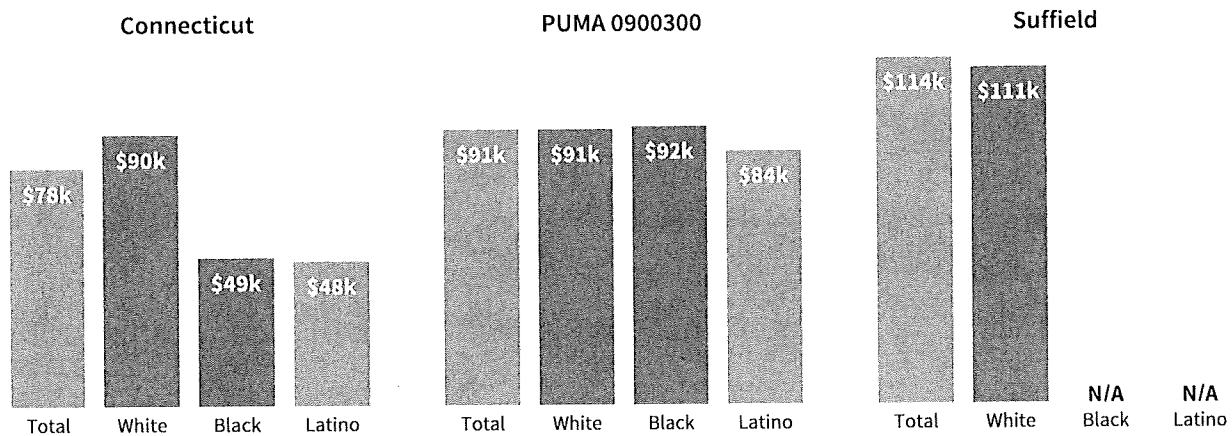

FIGURE 11: UNEMPLOYMENT RATE BY RACE/ETHNICITY, 2019

INCOME & WEALTH

The median household income in Suffield is \$114,208, compared to \$78,444 statewide. Racial disparities in outcomes related to education, housing, and wages result in disparate household-level incomes and overall wealth. Racial disparities in outcomes related to education, employment, and wages result in disparate household-level incomes and overall wealth. Households led by Black or Latino adults generally average lower incomes than white households.

FIGURE 12: MEDIAN HOUSEHOLD INCOME BY RACE/ETHNICITY OF HEAD OF HOUSEHOLD, 2019

The Supplemental Nutritional Assistance Program (SNAP, or food stamps) is a program available to very low-income households earning less than 130 percent of the federal poverty guideline (\$25,750 for a family of four in 2019). Throughout the state, poverty and SNAP utilization rates are higher among Black and Latino households than white households.

TABLE 7: SELECTED HOUSEHOLD ECONOMIC INDICATORS BY RACE/ETHNICITY OF HEAD OF HOUSEHOLD, 2019

	Total		White		Black		Latino		Asian		Native American	
	Count	Share	Count	Share	Count	Share	Count	Share	Count	Share	Count	Share
Population living below poverty level												
Connecticut	344,146	10%	137,123	6%	65,664	18%	123,431	22%	12,398	8%	1,629	17%
PUMA 0900300	8,285	6%	4,892	4%	1,392	9%	1,404	13%	215	3%	<50	N/A
Suffield	186	1%	168	1%	<50	N/A	<50	N/A	<50	N/A	<50	N/A
Households receiving food stamps/SNAP												
Connecticut	162,967	12%	67,339	7%	34,650	26%	56,091	32%	3,145	6%	958	26%
PUMA 0900300	4,166	7%	2,815	6%	604	11%	512	20%	92	3%	<50	N/A
Suffield	151	3%	151	3%	<50	N/A	<50	N/A	<50	N/A	<50	N/A

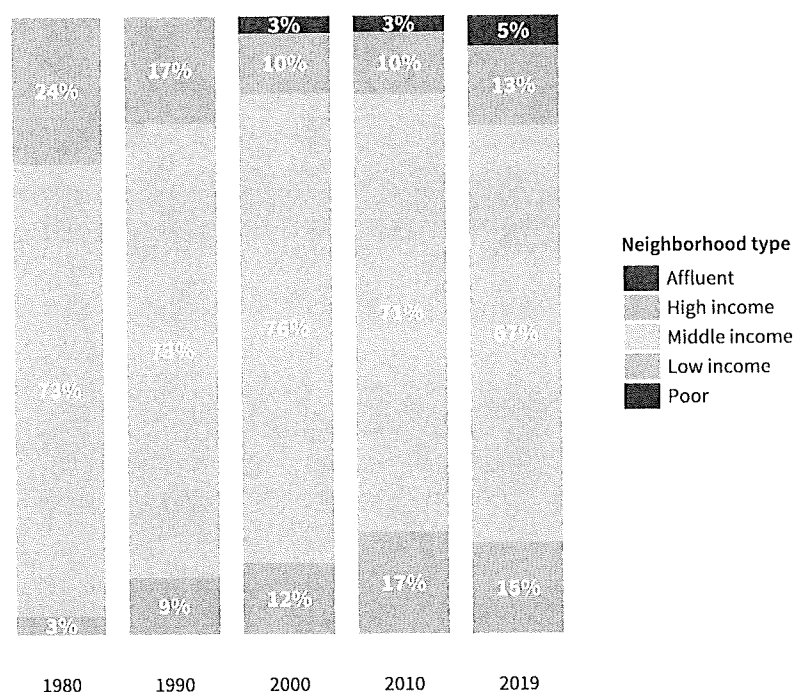

Access to a personal vehicle may also be considered a measure of wealth since reliable transportation plays a significant role in job access and quality of life. Vehicle access reduces the time a family may spend running errands or traveling to appointments, school, or work.

TABLE 8: HOUSEHOLDS WITH NO VEHICLE AT HOME BY RACE/ETHNICITY OF HEAD OF HOUSEHOLD, 2019

Area	Total		White		Black		Latino		Other race	
	Count	Share	Count	Share	Count	Share	Count	Share	Count	Share
Connecticut	121,434	9%	55,942	6%	27,048	21%	30,496	17%	7,948	10%
PUMA 0900300	2,691	4%	1,974	4%	318	6%	124	5%	275	8%
Suffield	121	3%	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A

Over the past 40 years, neighborhood income inequality has grown statewide as the share of the population living in wealthy or poor neighborhoods has increased and the population in middle income areas declined in a process known as “economic sorting,” which often leads to further disparities in access to economic opportunity, healthy environments, and municipal resources.

FIGURE 13: DISTRIBUTION OF POPULATION BY NEIGHBORHOOD INCOME LEVEL, PUMA 0900300, 1980–2019

HEALTH

The socioeconomic disparities described above tend to correlate with health outcomes. Factors such as stable housing, employment, literacy and linguistic fluency, environmental hazards, and transportation all impact access to care, physical and mental health outcomes, and overall quality of life. Income and employment status often drive differences in access to healthcare, the likelihood of getting preventive screenings as recommended, the affordability of life-saving medicines, and the ability to purchase other goods and services, including high-quality housing and nutritious food.

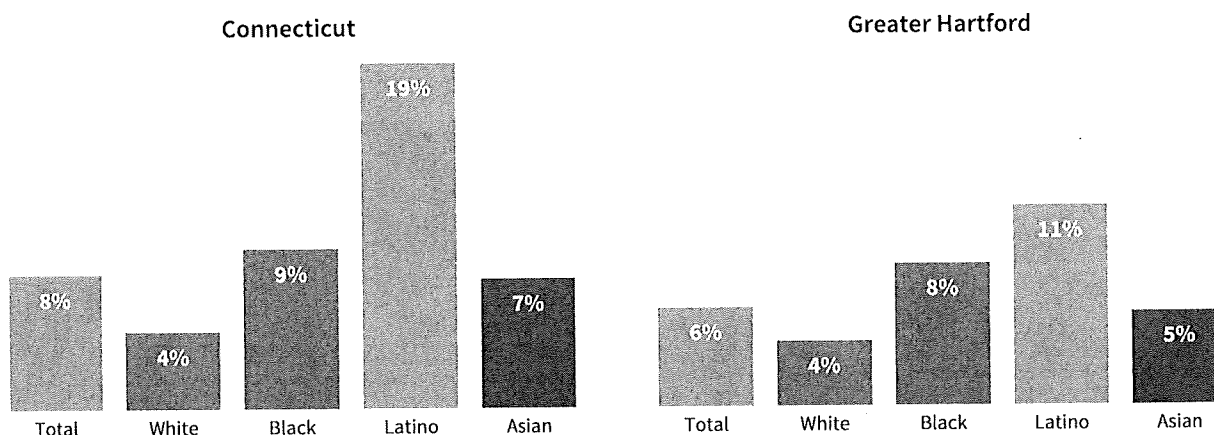

Life expectancy is a good proxy for overall health and well-being since it is the culmination of so many other social and health factors. The average life expectancy in Suffield is 81 years, compared to 80.3 years across PUMA 0900300, and 80.3 years statewide.

FIGURE 14: LIFE EXPECTANCY, PUMA 0900300 BY CENSUS TRACT, 2015

Health-related challenges begin with access to care. Due to differences in workplace benefits, income, and eligibility factors, Black and especially Latino people are less likely to have health insurance than white people.

FIGURE 15: UNINSURED RATE AMONG ADULTS AGES 19–64 BY RACE/ETHNICITY, 2019

Preventive care can help counteract economic disadvantages, as a person's health can be improved by addressing risk factors like hypertension and chronic stress early. Lack of affordable, accessible, and consistent medical care can lead to residents relying on expensive emergency room visits later on. Overall, 79 percent of the adults in Suffield had an annual checkup as of 2018, and 81 percent had a dental visit in the past year.

FIGURE 16: PREVENTIVE CARE MEASURES, SHARE OF ADULTS BY CENSUS TRACT, PUMA 0900300

Throughout the state, people of color face greater rates and earlier onset of many chronic diseases and risk factors, particularly those that are linked to socioeconomic status and access to resources. For example, diabetes is much more common among older adults than younger ones, yet middle-aged Black adults in Connecticut have higher diabetes rates than white seniors.

FIGURE 17: SELECTED HEALTH RISK FACTORS, SHARE OF ADULTS, 2015–2018

		Excellent/very good self-rated health	Food insecurity	Smoking	Obesity	Exercise 3+ days a week
Connecticut	Total	60%	13%	14%	27%	61%
Greater Hartford	Total	60%	13%	14%	27%	61%
	White	61%	10%	14%	27%	63%

Mental health issues like depression and anxiety can be linked to social determinants like income, employment, and environment, and can pose risks of physical health problems as well, including by complicating a person's ability to keep up other aspects of their health care. People of color are slightly more likely to report feeling mostly or completely anxious and being bothered by feeling depressed or hopeless. Overall, 11 percent of Suffield adults report experiencing anxiety regularly and 8 percent report being bothered by depression.

TABLE 9: SELECTED MENTAL HEALTH INDICATORS, SHARE OF ADULTS, 2015–2018

	Total	White	Black	Latino	Asian	Native American
Experiencing anxiety

Greater Hartford	9%	8%	10%	15%	6%	15%
Suffield	8%	2%	N/A	N/A	N/A	N/A

Like other states, Connecticut has seen a rise in drug overdose deaths in the last several years. In 2020, Connecticut saw an average of 113 overdose deaths per month, up from 60 in 2015. White residents long comprised the bulk of these deaths, but as overall overdose death rates have increased, an increasing share of those deaths have been people of color.

FIGURE 20: AGE-ADJUSTED SEMI-ANNUAL RATES OF DRUG OVERDOSE DEATHS PER 100,000 RESIDENTS BY RACE/ETHNICITY, 2015–2020

Note: Values suppressed for small populations or few overdose incidents.

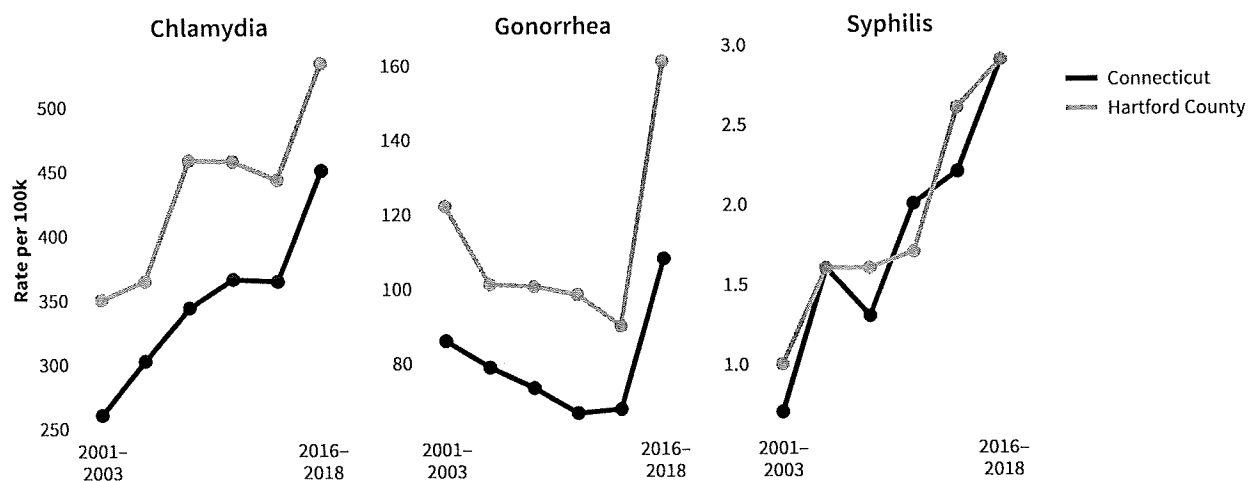

The introduction and spread of fentanyl in drugs—both with and without users' knowledge—is thought to have contributed to this steep rise in overdoses. In 2015 and 2016, 60 percent of the drug overdose deaths in 0900300 involved fentanyl; in 2019 and 2020, this share was 87 percent.

FIGURE 21: SHARE OF DRUG OVERDOSE DEATHS INVOLVING FENTANYL, 2015–2020

Sexually transmitted infections (STIs) can have long-term implications for health, including reproductive health problems and certain cancers, and can increase the risk of acquiring and transmitting diseases such as HIV and hepatitis C. Following nationwide trends, Connecticut has seen increases in the rates of STIs like chlamydia and gonorrhea over the past two decades. Between 2016 and 2018, Hartford County had annual average case rates of 533 new cases of chlamydia per 100,000 residents, 161 cases of gonorrhea per 100,000, and 2.9 cases of syphilis per 100,000.

FIGURE 22: ANNUALIZED AVERAGE RATES OF NEW CASES OF SELECTED SEXUALLY TRANSMITTED INFECTIONS PER 100,000 RESIDENTS, 2001–2003 THROUGH 2016–2018

Like many other diseases, Connecticut's Black and Latino residents face a higher burden of HIV rates. Statewide between 2016 and 2018, Black residents ages 13 and up were more than 10 times more likely to be diagnosed with HIV than white residents.

FIGURE 23: ANNUALIZED AVERAGE RATE OF NEW HIV DIAGNOSES PER 100,000 RESIDENTS AGES 13 AND OVER, 2016-2018

Birth outcomes often reflect health inequities for parents giving birth, and those outcomes can affect a child throughout their life. Often, parents of color have more complications related to birth and pregnancy than white parents. Complications during pregnancy or childbirth also contribute to elevated mortality among parents giving birth.

TABLE 10: SELECTED BIRTH OUTCOMES BY RACE/ETHNICITY OF PARENT GIVING BIRTH, 2016–2018

FIGURE 24: MATERNAL MORTALITY RATE PER 100K BIRTHS, CONNECTICUT, 2013–2017

Children under 7 years old are monitored annually for potential lead poisoning, based on having blood-lead levels in excess of the state's accepted threshold. Between 2013 and 2017, 1.1 percent of children tested in Suffield were found to have elevated lead levels. Children living in homes built before 1960 are at a higher risk of potential lead poisoning due to the more widespread use of lead-based paints in older homes. Black and Latino households are slightly more likely to live in structures built before 1960.

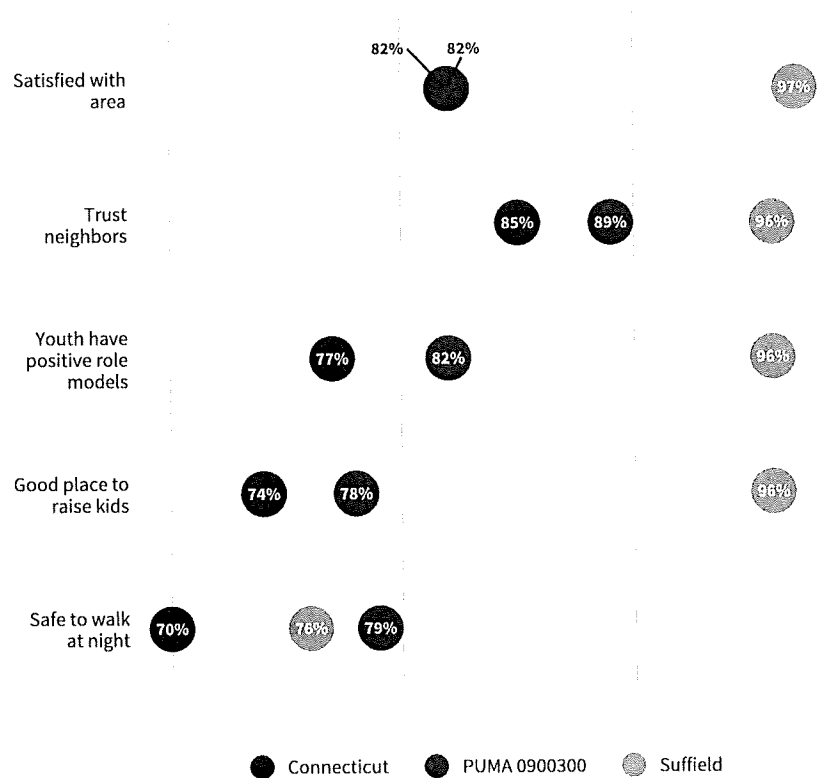

TABLE 11: HOUSEHOLDS LIVING IN STRUCTURES BUILT BEFORE 1960 BY RACE/ETHNICITY OF HEAD OF HOUSEHOLD, 2019

CIVIC LIFE & COMMUNITY COHESION

Beyond individual health, several measures from the DataHaven Community Wellbeing Survey show how local adults feel about the health of their neighborhoods. High quality of life and community cohesion can positively impact resident well-being through the availability of resources, sense of safety, and participation in civic life. For example, adults who see the availability of role models in their community may enroll their children in extracurricular activities that benefit them educationally and socially; residents who know and trust their neighbors may find greater social support. Overall, 97 percent of Suffield adults reported being satisfied with the area where they live.

FIGURE 25: RESIDENTS' RATINGS OF COMMUNITY COHESION MEASURES, SHARE OF ADULTS, 2015-2018

Crime rates per 100,000 residents are based on reports to law enforcement of violent force against persons, as well as offenses involving property. Not all crimes involve residents of the areas where the crimes occur, which is important to consider when evaluating crime rates in areas or towns with more commercial activity. Crime patterns can also vary dramatically by neighborhood. Crime can impact the social and economic well-being of communities, including through negative health effects.

FIGURE 26: PART I CRIME RATES PER 100,000 RESIDENTS BY TOWN / JURISDICTION, 2019

Crimes against persons

Crimes against property

A lack of trust in and engagement with local government and experiences of unfair treatment by authorities can impair community well-being and cohesion. Sixty-two percent of Suffield adults feel their local government is responsive to residents' needs, compared to 51 percent statewide.

TABLE 12: RESIDENTS' RATINGS OF LOCAL GOVERNMENT, SHARE OF ADULTS, 2015-2018

Area	Unfairly stopped by police	Local govt is responsive	Have some influence over local govt
Connecticut	11%	51%	67%
PUMA 0900300	11%	49%	67%
Suffield	18%	62%	85%

During the 2020 presidential election, 87 percent of Suffield registered voters cast ballots, compared to 80 percent statewide, and to 84 percent in the 2016 presidential election.

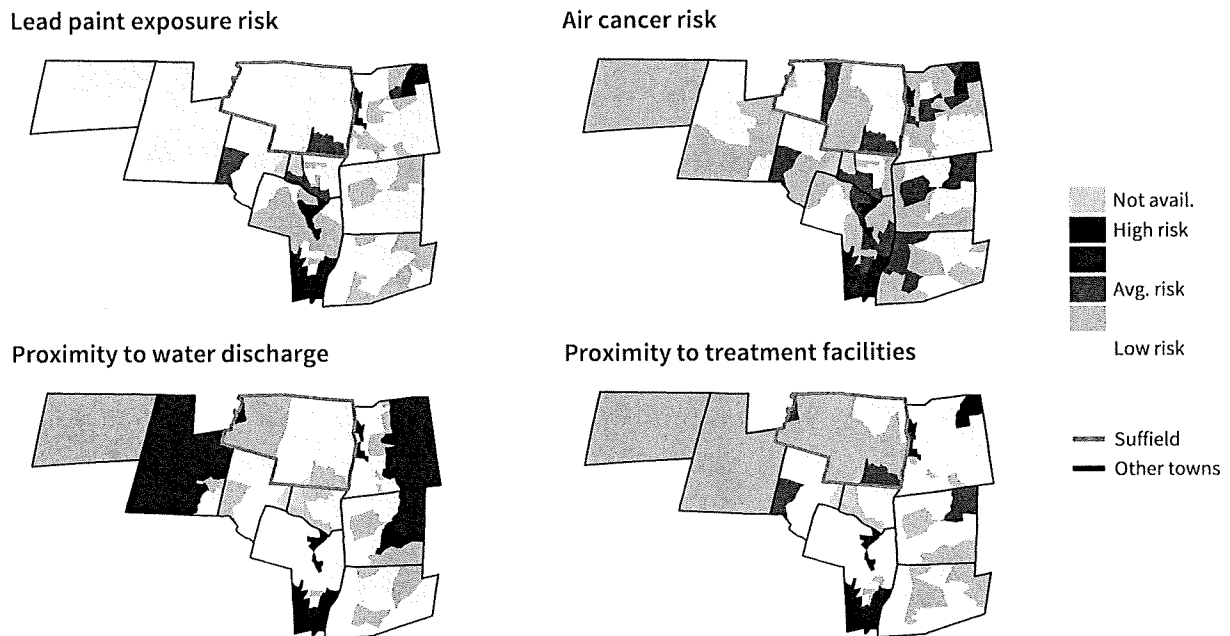

FIGURE 27: REGISTERED VOTER TURNOUT, 2018–2020

ENVIRONMENT & SUSTAINABILITY

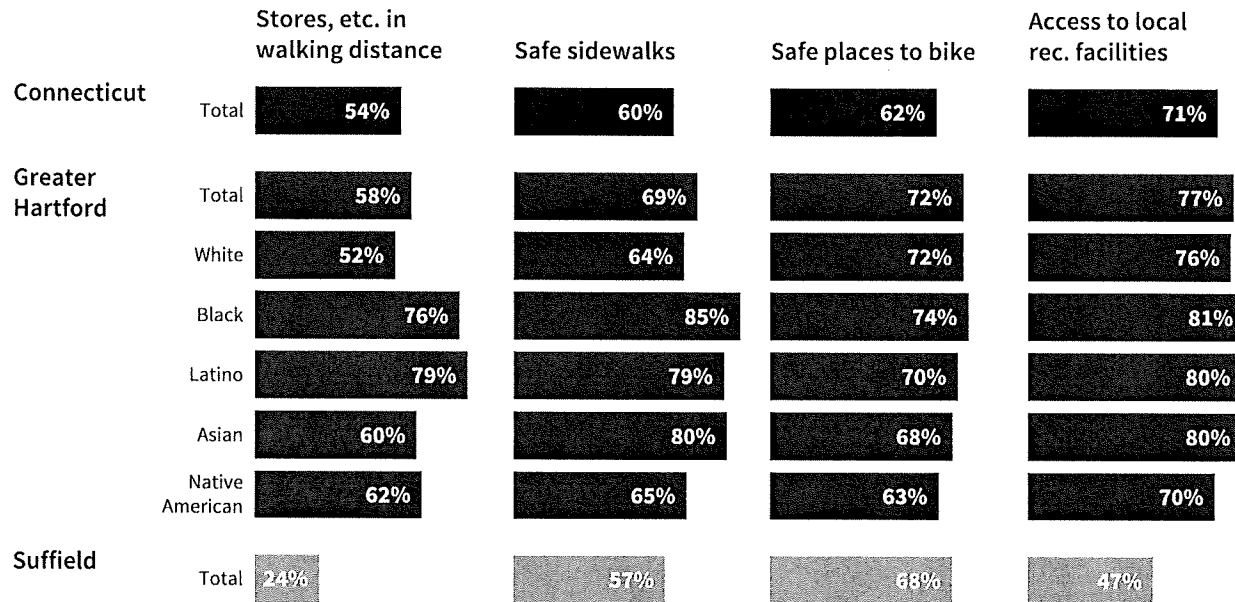

Many environmental factors—from access to outdoor resources to tree canopy to exposure to pollutants—can have direct impacts on residents' health and quality of life. Environmental justice is the idea that these factors of built and natural environments follow familiar patterns of socioeconomic disparities and segregation. The federal Environmental Protection Agency (EPA) ranks small areas throughout the US on their risks of exposure to a variety of pollutants and hazards, scaled to account for the historically disparate impact of these hazards on people of color and lower-income people.

FIGURE 28: EPA ENVIRONMENTAL JUSTICE INDEX BY BLOCK GROUP, PUMA 0900300

High-quality built environment resources, such as recreational facilities and safe sidewalks, help keep residents active and bring communities together. Walkable neighborhoods may also encourage decreased reliance on cars. Throughout Connecticut, Black and Latino residents are largely concentrated in denser urban areas which tend to offer greater walkability. Of adults in Suffield, 24 percent report having stores, banks, and other locations they need in walking distance, lower than the share of adults statewide.

FIGURE 29: RESIDENTS' RATINGS OF LOCAL WALKABILITY MEASURES BY RACE/ETHNICITY, SHARE OF ADULTS, 2015–2018

ABOUT DATAHAVEN

DataHaven is a non-profit organization with a 25-year history of public service to Connecticut. Our mission is to empower people to create thriving communities by collecting and ensuring access to data on well-being, equity, and quality of life. DataHaven is a formal partner of the National Neighborhood Indicators Partnership of the Urban Institute in Washington, D.C.
