RE: Porters Lane Sanitary Sewer and Water Main Replacement

Dear Resident:

The sanitary sewer on the west side of Porters Lane requires replacement. The repair of the sanitary sewer is in the same general location. The water main within that area will be replaced as well. The westerly portion of Porters Lane will be closed throughout construction. In addition, a portion of Club Drive at the west intersection with Porters Lane will be closed for part of the project. Attached is a map of the project area.

The contractor selected for the work is F.D.M. Contracting, Inc. from Shelby Twp., Michigan, and the project will be managed by our consulting engineers, Hubbell, Roth & Clark, Inc. (HRC). The contractor has already begun working on Porters Lane and closed that portion of the road. The Club Drive road closure will begin soon after May 5, 2022. This project is likely to extend through the summer with final restoration being completed in September 2022. Updates on when the Club Drive closure will occur will be posted on the Bloomfield Township social media outlets and e-newsletters. Click the "sign-up" link at the bottom of the Bloomfield Township E-Newsletter page at the following link to sign up for the E-newsletters. <https://www.bloomfieldtwp.org/Resources/E-Newsletter.aspx>

Should you have a concern or question about the project and road closures, please notify the Project Engineer, Bloomfield Township Engineering and Environmental Services Department, or F.D.M. Contracting, Inc., as listed herein:
