

Know Your Health Care FSA Eligible and Ineligible Expenses

Maximize the Value of Your Reimbursement Account - Your Health Care Flexible Spending Account (FSA) dollars can be used for a variety of out-of-pocket health care expenses that qualify as federal income tax deductions under Section 213(d) of the Internal Revenue Code (“IRC”).

- Health Care FSA dollars can be used to reimburse you for medical and dental expenses incurred by you, your spouse or eligible dependents (children, siblings, parents and other dependents which are defined in your Plan Documents).

IMPORTANT: The IRS defines which medical expenses are eligible under a tax-deferred account. Not all expenses are eligible under all plans. An employer may limit which expenses are allowable under their Health Care FSA. If you are unsure of what your Health Care FSA and/or HRA dollars may be used for, please contact your Plan Administrator.

Here is a sample list of expenses currently eligible and not eligible by the Internal Revenue Service (“IRS”) as deductible medical expenses. This list is not necessarily inclusive or exclusive, and may be subject to change based on regulations, IRS revenue rulings and case law. It is solely based on our current interpretation of IRC Section 213(d) and is not intended to be legal advice.
