

Student Motor Vehicles

Student use of a motor vehicle on school property is a privilege and comes with the responsibility of operating the vehicle in a responsible and safe manner. Additionally, parking a vehicle on school property carries this same degree of privilege and responsibility and requires a parking permit.

Annually, the Principal (or designee) will develop necessary criteria for students to be eligible for a parking permit and will establish a process to distribute available parking permits in as fair and equitable of a manner as reasonably possible.

Retention of a parking permit is a privilege and will be conditionally based on continuous responsible use, and if applicable, based on maintaining eligibility of the established criteria.
