

Bus Conduct

In accordance with RSA 189:9A, the Superintendent of Schools will designate appropriate Building Administrators at both the elementary and secondary levels as those officials having the authority to oversee and administer the conduct of students while riding school buses.

Rules of conduct for student behavior are to be found in copies of the Student Handbook and/or in the office of each school building. These rules will be reviewed with the students at the beginning of each school year by an appropriate administrator and/or teacher.

Violations of the bus conduct rules will be reported to the Location Manager by the bus driver or school bus monitor. The Location Manager will contact the appropriate school Principal (or designee).

After investigation of the reported incident, the Principal (or designee) will take appropriate action in keeping with the severity of the offense. Circumstances surrounding each reported incident will be reviewed by the Principal (or designee) on a case-by-case basis.
