

Child Custody Disputes

In cases of known disputes regarding the custody of children who attend the Inter-Lakes schools, the school authorities will attempt to cooperate fully with the parent or person with whom the child or children are residing. School authorities will not prevent parents or legal guardians from information regarding, or access to, their children. They will, if possible, notify the parent or person with whom the child resides of any unusual inquiries or visitations to the school by unfamiliar person(s) claiming legal access to, or visitation privileges with, a specific child.

In the event that school authorities have reason to suspect a wrong doing with regard to the above, the local police will be notified. The safety and proper welfare of the children will govern the actions of all school employees.
