

Liberty Junior School - Traffic Pattern

- There should be 2 lanes of traffic once you are in the parking lot off Dutchland Parkway.
- The lane closest to the building will be the "drop off" lane.
- After dropping off students, cars should change lanes into the "continuous lane" to exit the lot.
- If a car enters the lot in the "continuous lane", the car should drive along in the "continuous lane" until they can change lanes into the "drop off" lane and let students out of the vehicle.
- For student safety reasons, please do not drop off or pick up students while in the "continuous lane".
- No staff members will park in the front row closest to school. Parents should park in these spots during dismissal.
- *We ask that parents "back into" parking spots at dismissal.* This increases the ease and safety of cars leaving our lot.
