

Anchor

Our commitment is to meet the unique academic, social and emotional needs of all students through learning that connects students' lives to their future in a safe, supportive and nurturing environment in order to empower and inspire all students for middle school, high school, and college and career readiness.

What We Offer

As an alternative education program, it is our mission to meet the unique academic, social and emotional needs of all students through learning that connects students' lives to their future in a safe, supportive and nurturing environment in order to empower and inspire all students for middle school, high school and college and career readiness.

In doing so, the SPS Anchor at Harbor Landing sets high expectations, provides choice and maintains small class size. High expectations are set for all students and staff to take an active role in building a safe learning environment and positive relationships through restorative practices. Academic expectations are set high where students are provided with choice to engage in deep, real-world learning. The small class size allows teachers to give students more individual attention and tailor lessons specific to students' needs. Essentially, the small class size allows for greater connectedness between staff and students to create safety, enhance learning and build community.

SPS Anchor High School and Middle School Programs offer students a small setting to achieve academically, physically, and social emotionally.

What We Do
