The Bridge  
At  
ACES

# Our Mission

Our mission is to provide opportunities for our students to create **personalized academic, career development, social/emotional and goal-driven outcomes** all while working towards a high school diploma.

The students will have an increased awareness of *why school has been difficult*, while **learning new behavioral strategies for future success.**

# Our Bridge Educators

The Bridge at ACES provides educators **training in collaborative teaching and learning**, in order for **students** to have opportunities to **take a leadership role in their learning and personalized goal planning.**

**If teachers** shift classroom/goal development control **to students' lead** then teachers will provide flexibility and opportunities **for both** to take risks.

aces

# Our Students

The Bridge at ACES students found it **difficult to achieve success** in the **traditional classroom setting**. They **benefit** from a **personalized environment** in which to **learn and form strong connections with school educators and peers in a smaller setting**.

**The Bridge at ACES** will be designed to address the needs of students who *may* require a school setting that *supports community integration*, as well as a **positive transition to home school districts, post-secondary education, vocational training, or the workforce.**

**The Bridge at ACES** will *provide* students with opportunities to *increase* their **knowledge in core academic areas** within **rigorous classroom settings** aligned with the State of Connecticut curriculum standards.
