

EMERGENCY WEATHER CLOSINGS

It is the general policy of the Board to operate the schools during periods of heavy snow or other inclement weather conditions. Teachers, staff and students should presume that schools will operate unless otherwise notified.

During periods of heavy snowfall or for other emergencies:

- The local radio and television stations will carry broadcasts covering school closures.
- The district Transportation office will update the department website and the Transportation Snow Phone for bus route information.
- School closure or school start delay notification will be posted on the Mead website.
- If the decision is made to close schools during the school day, notification will be carried on radio and television news programs and the Mead School District website.
