1. The learning management system used, including Shareable Content Object Reference Model (SCORM) compliance

Edgenuity's K-5 content is available via the BUZZ LMS and Edgenuity's 6-12 content is available via Edgenuity's proprietary LMS. Both Learning Management Systems integrate seamlessly with the Student Information System (SIS) utilized by our virtual instructors.

Edgenuity has a robust API that allows for easy interchange of data between systems. Edgenuity has successfully implemented a number of integrations with a variety of LMS and SIS providers. Data integration includes student information, enrollment, withdrawals, and grade reporting. This does not include assessments. Edgenuity has adopted the LTI standard for content inter-operability and supports the IMS LTI standard for allowing access to Edgenuity content from other learning management systems. Edgenuity is LTI 1.1 compliant.

2. Third-party providers used and their interactions with stakeholders, including how this interaction is monitored

Edgenuity utilizes third party providers to provide a broader catalog of course offerings, however, third-party providers will not interact with stakeholders in place of Edgenuity.

Virginia Department of Education
Approved Multidivision Online Provider Summary
School Year: 2021-2022

Edgenuity (10)

3. Instructional model used in courses

Content is designed and created by cross-functional teams of experienced educators and instructional designers with degrees in curriculum development, instructional design, instructional technology, and content-area education. Using the principles of backward design, the team outlines each unit of instruction to capture big ideas and essential questions, refine learning objectives and lesson questions, and document anchor assessments and tasks. Then prototype lessons are work shopped and team-reviewed against research-based best practices, such as the National Standards for quality Online Learning (NSQ), and our own development rubrics and guidelines before the remainder of the lessons are created. The content provides realistic academic rigor and is organized by connected units and lessons that fall into a logical sequence. Each unit and lesson includes an overview describing objectives, activities, assignments, assessments, and resources to provide multiple learning opportunities for students to master the content. The instructional design incorporates established principles of effective instruction that contribute to student achievement in a variety of learning environments. Additionally, the curriculum is designed using research based and modern pedagogical strategies that incorporate constructivist learning strategies including inquiry, real world applications, critical thinking, and collaborative discussions and projects.

Curriculum provides intensive, explicit, and systematic instruction. The content addresses students differences, readiness levels, cultural backgrounds, intelligence preferences, and learning styles.

4. Technology infrastructure model used to deliver and support courses

The system utilizes SQL and Mongo database repositories. Database partitioning is used to keep customer data separated; data is split over 23 realms using a sequel technique to prevent access to data between individual customers.. Access to any database containing confidential data requires at least one full factor of authentication. As a privately held company, detailed information regarding system architecture is confidential and would require a non-disclosure agreement.

Approved Multidivision Online Provider Summary
School Year: 2021-2022

Edgenuity (10)

5. In general, online teacher qualifications, including academic credentials, licensure, certifications, experience, and the teacher review process

Edgenuity employs highly qualified and experienced educators committed to working in an innovative, diverse, and dynamic team of people dedicated to driving positive academic outcomes for students and educators. Each instructor is certified and meets the professional teaching standards established by the state.

Virtual instructors hold a Bachelors degree (at minimum) in education or a related field and meet all federal guidelines for highly effective teachers. All instructors are highly trained in online teaching and possess at least one state-issued current / valid teaching license as well as any applicable endorsements. Instructors participate in ongoing professional learning as applicable. Evaluations are conducted regularly by supervisory staff.

The Company adheres to federally recommended guidelines to ensure we are consistently staffed with teachers who meet state credentialing guidelines.

Teachers must meet the following criteria to be hired:

State teacher certification in core subjects, world language, business, technology, art, health, or physical education at the appropriate grade level

3 years experience as a teacher preferred

1 year experience teaching in subject area

Fingerprint clearance card

Technically proficient and the ability to learn new technology and online systems quickly

6. Average teacher load by subject area or grade-level range

Below are the average teacher full load ratios by grade level range:

Overall Student to Teacher Full Load Ratio Grades K-5: 50:1

Overall Student to Teacher Full Load Ratio Grades 6-8: 6:1

Overall Student to Teacher Full Load Ratio Grades 9-12: 21:1

Virginia Department of Education
Approved Multidivision Online Provider Summary
School Year: 2021-2022

Edgenuity (10)

7. In general, type and frequency of synchronous and asynchronous methods of student-teacher interaction, including the monitoring process

The content provides opportunities for students to interact with their teachers (and peers) regularly to deepen understanding, address questions, and receive feedback on progress and achievement. Edgenuity's learning management system provides multiple asynchronous communication options to facilitate appropriate instructor-student and teacher approved student-student interaction. Communication options include secure internal email, announcements, and Collaboration Corner discussions. These communication options can be used for students to collaborate, discuss, and further process information. All communications are embedded in the secure Edgenuity system and do not require students to access outside resources.

Additionally, Students have direct communication and ongoing interaction with virtual instructors and Concept Coaches (secondary only, as needed) throughout all courses. Virtual instructors communicate with students regularly to support success and provide assistance in order to facilitate the use of the curriculum and learning resources. Instructors use real-time data to inform frequent communications with students, families, and school mentors. Teachers reach out to students via email, phone, and web conferencing to reteach difficult concepts and ensure students are on track for success. Guidelines for communicating with the online teacher and any course requirements are provided for students by email from the course instructor before the course begins. Students can also access support information and technical requirements via the website.

Each virtual instructor has office hours and additional established communication hours and methods to ensure students can contact the teacher as needed. The online instructor provides their contact information for students and parents by welcome message via email, text, or phone. Virtual instructors also often include their office hours and study hall information in their email signature to encourage continued communication, including SMS texting.

8. Average teacher availability (hours of support) for students and parents, including communication methods

Edgenuity's Instructional Services teachers schedule instructional time with individual students. Teachers frequently check voicemail, email, and instant messages (IM), or check for student communications at least twice per day. Instructional policy is response time of 24 hours during the work week. Teachers will be available to students and parents either by email or telephone during scheduled office hours. Virtual instructors also often include their office hours and study hall information in their email signature to encourage continued communication. Teachers, lead instructors, coaches or other academic support personnel are available during the hours below.

Availability of Instructional Personnel

Edgenuity (10)

9. Technical support availability for students, parents, and school personnel and methods for providing timely support

Customer and Technical Support is available seven days a week and includes phone support, chat and a web-based help desk option for all end users: students, parents, educators, administrators, etc. Edgenuity's multi-channel customer and technical support model is based on escalation point levels to assist with implementation and user support needs and ensure prompt and thorough issue resolution.

Through toll-free phone and e-mail support, our team of customer support professionals is able to respond to your needs in an efficient and timely manner.

Phone Number: 877.202.0338

Email: customersupport@edgenuity.com

Hours of Operation

Monday through Friday: 7:30 a.m. to 9:30 p.m. (Eastern Time)

Saturday and Sunday: 9 a.m. to 5 p.m. (Eastern Time)

10. How student progress is monitored and reported, including verification of authenticity of student work

The Instructional Services division employs a comprehensive, state-of-the-art student information system that provides and displays learning analytics so that students, guardians, teachers, and other staff members can track academic progress, grades, and activity levels. Using configurable filters, users can easily detect students who are struggling whether for lack of engagement or low scores and intervene by sending customized and automated emails.

Additionally, Edgenuity's native authentication system requires each user to have a unique username and password to access the system. Access is based on permissions / roles and password complexity is enforced. All logins to the system are logged.

11. Course completion rates and graduation rates, where applicable

The SIS tracks year-over-year completion rates by course, department, teacher, school, or other grouping, making it easy to identify overall trends or variables that may affect students' performance. Completion rates for the 2020-2021 school year are included in section II of this monitoring report.

School Year: 2021-2022

Edgenuity (10)

12. Information on student test scores, including Virginia's Standards of Learning assessment outcomes; English language proficiency; the SAT, ACT, and Advanced Placement test outcomes; and outcomes on other standardized assessments as applicable

The solution has been proven to have a positive impact on student achievement across a wide variety of populations including low-income and under-achieving students. Edgenuity employs systematic and regular processes and procedures for collecting and analyzing data sources. Data sources include comparison and trend data that provide a comprehensive and complete picture of student learning, instruction, the effectiveness of programs and the systems that support learning. Corporation and school personnel use data to design, implement and evaluate continuous plans. These plans facilitate improved student learning outcomes, better instruction, and overall effectiveness. Edgenuity will be working with partner districts to obtain Virginia SOL assessment outcomes starting in the 2021-2022 school year.

In addition to Edgenuity's Research Department efficacy studies, research conducted by independent statisticians confirms that Edgenuity solutions are having a positive impact on student achievement across grade levels and student populations. We continue to partner with school districts and third-party research organizations to conduct evaluations that measure results and drive success for all students. A summary of these evaluations can be found here:

<https://www.edgenuity.com/results-from-online-learning/>

13. Specific special education supports and services for students with disabilities who have an individualized education program (IEP) or a 504 Plan

Edgenuity employs a Special Education Services (SES) team to assist schools with tasks ranging from secure documentation intake to course customization to monitoring and reviewing performance and providing input on how IEPs may need to change. These individuals work directly with the Edgenuity virtual instructor, program SPED teacher of record, program personnel, school / district if applicable, and families to meet the needs of every student.

Additionally, Edgenuity's LMS is designed to provide specific special education supports and services for students with disabilities who have an IEP or 504 plan. These accommodations include addressing multiple learning styles, accommodations for assessments, video captions / transcripts, individualized and customizable assignment calendars, read-aloud and translation tools, and many other features and accommodations. Additionally, courses can be individually modified to amend time limits on assessments, enable pretesting, modify the passing threshold, modify grade weights, enable eNotes and more. There are processes in place with the SES team to ensure IEPs and 504 plans can be met and documented via the secure system.

Edgenuity (10)

14. Information on support services, including career explanation and counseling, academic advising and placement, assistance for students with limited English proficiency, mental health and social services, gifted education, high school/college dual-enrollment credits, etc.

Edgenuity Instructional Services partners with schools and districts across the nation to provide standards-aligned online courses taught by virtual instructors who are highly qualified and state-certified. Instructors provide multiple layers of support to ensure students have everything possible to be successful. In addition to highly qualified instructors, students in core courses grades 6 and above also have access to Concept Coaches, for on-demand tutoring and support. School and District personnel have ongoing access to real-time data and reports, providing the ability to track and monitor students progress and performance at any time. This data can be utilized to provide district personnel such as counselors and academic advisors an insight into student achievement in courses. Edgenuity's Account Management team will work closely with districts as requested to provide best practices and guidance on ways to incorporate these reporting tools into support services.

To support mental health and social services, Edgenuity proudly offers comprehensive social and emotional learning courses. Together, these courses include over 400 instructional activities delivered via Edgenuity's robust learning management system with comprehensive customization functionality.

In addition to providing highly qualified educators and real time data to support various district services, Edgenuity also offers a wide variety of general electives as well as Career and Technical Education (CTE) electives, Social and Emotional Learning content, world language courses, options for Advanced Placement courses, test preparation content, and intervention solutions. These additional content offerings can be used to support a variety of student needs, from students with limited English proficiency to gifted students.

15. Information on Internet safety policies, procedures, and monitoring

Edgenuity provides students with information related to internet safety policies and procedures. An example of the types of information Edgenuity shares can be found in the Student Handbook:

<https://www.edgenuity.com/wp-content/uploads/2019/10/Edgenuity-student-handbook-2019-2020.pdf>

16. Information on disaster recovery plans and strategies for addressing short- and long-term service interruptions

The Company regularly reviews applicable security policies, backup and disaster recovery procedures, change management and operational procedures, and business continuity plans as appropriate. Periodic testing on Company systems is conducted internally and via third-party partners to ensure continued effectiveness of the solution and environment. Edgenuity also maintains an Incident Response Procedure to outline response to a multitude of disasters or potential security incidents. The plan outlines procedures for mitigating damage, investigating the cause, and recovering data or services.

Edgenuity (10)

17. Program experience in providing online or virtual instruction programs

Founded in 1998, Edgenuity is a leading provider of online and blended learning solutions, offering a comprehensive suite of Cognia (formerly AdvancED) accredited K-12 digital curriculum. We have a long-standing history of serving diverse students and implementations across schools and districts of all sizes; we do this by developing strong personalized partnerships with elementary, middle, and high schools as well as other public and private entities nationwide to deliver core courses, credit recovery, supplemental instruction, intervention, test preparation, virtual instruction, and professional development. With our acquisition and integration of Compass Learning in 2016 and both LearnZillion and Odysseyware in 2019, the combined company experience and history includes a wide range of industry experience and serves over four million students annually.

1. The learning management system used, including Shareable Content Object Reference Model (SCORM) compliance

Canvas LMS

Virginia Department of Education
Approved Multidivision Online Provider Summary
School Year: 2021-2022

Proximity Learning, Inc. (20)

2. Third-party providers used and their interactions with stakeholders, including how this interaction is monitored

N/A

3. Instructional model used in courses

Proximity Learning provides virtual certified teachers to schools when they cannot supply a teacher of their own.

4. Technology infrastructure model used to deliver and support courses

The LMS used is Canvas and the online classroom platform is Zoom

5. In general, online teacher qualifications, including academic credentials, licensure, certifications, experience, and the teacher review process

Proximity Learning follows state licensing guidelines while reviewing our teachers credentials. Teachers must complete a state approved teacher preparation program or obtain a four-year degree in their certification area. Proximity Learning identifies and hires highly qualified teachers who are able to meet the academic needs of their students. We verify our teachers certifications prior to hiring them, before placing them into classrooms, and audit our certifications at the end of each school year.

6. Average teacher load by subject area or grade-level range

5 courses are the average our teachers take. The grade levels mainly focus on 6th-12th.

7. In general, type and frequency of synchronous and asynchronous methods of student-teacher interaction, including the monitoring process

The schools get to pick the number of synchronous days they would like our teacher to meet with the students.. The Proximity teachers use canvas to provide online assignments and lessons. The teachers can monitor the students activity within canvas to see if a student is completing their work or if they need extra help.

School Year: 2021-2022

Proximity Learning, Inc. (20)

8. Average teacher availability (hours of support) for students and parents, including communication methods

Proximity teachers have to respond to a student within 24 hours if a question comes in outside of the synchronous class time. Within Canvas there is an internal email system that students and teachers can use to communicate. Within the synchronous class time the students can communicate with our teacher in real time using their microphones or by using the chat feature within Zoom. Parents are provided with observer access to monitor their students performance within canvas. This provides them with the internal email system as well to communicate with the teacher.

9. Technical support availability for students, parents, and school personnel and methods for providing timely support

Proximity provides a full support team that teachers, students, school personnel and parents can utilize. They can contact them via phone, chat or by email for support. The Support team is available from 7:00am-7:00pm CST Monday through Friday. There is also a contact on call over the weekends.

10. How student progress is monitored and reported, including verification of authenticity of student work

Proximity utilizes the schools grading policy. We also follow the schools grade dates for reporting. We will supply progress reports and report cards when following those dates. Within the Canvas LMS school admin have 24/7 access to the students progress as well. Within canvas our teachers set due dates, can set time limits and can set password to help with authenticity.

11. Course completion rates and graduation rates, where applicable

N/A

12. Information on student test scores, including Virginia's Standards of Learning assessment outcomes; English language proficiency; the SAT, ACT, and Advanced Placement test outcomes; and outcomes on other standardized assessments as applicable

N/A

13. Specific special education supports and services for students with disabilities who have an individualized education program (IEP) or a 504 Plan

Our teachers are able to use the information provided by the schools to accommodate each students needs. For example, we are able to modify assignments, provide extra time, check for understanding along with other means of support.

14. Information on support services, including career explanation and counseling, academic advising and placement, assistance for students with limited English proficiency, mental health and social services, gifted education, high school/college dual-enrollment credits, etc.

N/A

15. Information on Internet safety policies, procedures, and monitoring

Proximity Learning will use technology protection measures to block or filter, to the extent practicable any material harmful to minors over the network. Proximity Learning reserves the right to monitor users online activities and to access, review, copy, and store or delete any electronic communication or files and disclose them to others as it deems necessary. Proximity Learning will work with the school or school districts Acceptable Use Policy to tailor any disciplinary action to the specific issues related to each violation.

16. Information on disaster recovery plans and strategies for addressing short- and long-term service interruptions

Emergency lesson plans are provided to the school in case there is a power outage. This will allow for continued learning in the event the students are not able to connect.

17. Program experience in providing online or virtual instruction programs

Proximity Learning, Inc has been providing online education for 7+ years to students all over the USA. We utilize technology to connect teachers synchronously with students in their classroom or from home. We customize to the schools schedule and grading policies.
