

AP Physics 1 Scope & Sequence

| Days | Unit | Standard(s)/ Outcome(s) | Essential/Guiding Questions |
|------|--|--|--|
| 16 | <p>Unit 1: Kinematics <i>You'll be introduced to the study of motion.</i></p> | <p><u>BIG IDEAS:</u></p> <ul style="list-style-type: none"> ● Force Interactions ● Change <p><u>SCIENCE PRACTICES:</u></p> <ul style="list-style-type: none"> ● Modeling ● Mathematical Routines ● Experimental Methods ● Data Analysis ● Argumentation | <p>How can the motion of objects be predicted and/or explained?</p> <p>Can equations be used to answer questions regardless of the questions' specificity?</p> <p>How can the idea of frames of reference allow two people to tell the truth yet have conflicting reports?</p> <p>How can we use models to help us understand motion?</p> <p>Why is the general rule for stopping your car "when you double your speed, you must give yourself four times as much distance to stop?"</p> |
| 19 | <p>Unit 2: Dynamics <i>You'll revisit the concepts you worked with in Unit 1 to</i></p> | <p><u>BIG IDEAS:</u></p> <ul style="list-style-type: none"> ● Systems ● Fields ● Force | <p>How can the properties of internal and gravitational mass be experimentally verified to be the same?</p> |

| | | | |
|---|--|---|---|
| | <p><i>explore force, which is the interaction of an object with another object.</i></p> | <p>Interactions</p> <ul style="list-style-type: none"> ● Change <p>SCIENCE PRACTICES:</p> <ul style="list-style-type: none"> ● Modeling ● Mathematical Routines ● Experimental Methods ● Data Analysis ● Argumentation ● Make Connections | <p>How do you decide what to believe about scientific claims?</p> <p>How does something we cannot see determine how an object behaves?</p> <p>How do objects with mass respond when placed in a gravitational field?</p> <p>Why is the acceleration due to gravity constant on Earth's surface?</p> <p>Are different kinds of forces really different?</p> <p>How can Newton's laws of motion be used to predict the behavior of objects?</p> <p>Why does the same push change the motion of a shopping cart more than the motion of a car?</p> |
| 7 | <p>Unit 3: Circular Motion and Gravitation</p> <p><i>You'll build on your understanding of motion and force as you study more</i></p> | <p>BIG IDEAS:</p> <ul style="list-style-type: none"> ● Systems ● Fields ● Force Interactions ● Change <p>SCIENCE PRACTICES:</p> | <p>How does changing the mass of an object affect the gravitational force?</p> <p>Why is a refrigerator hard to push in space?</p> <p>Why do we feel pulled toward Earth but</p> |

| | | | |
|----|---|--|---|
| | <p><i>complex models of motion, such as the circular path of a satellite orbiting a planet.</i></p> | <ul style="list-style-type: none"> ● Modeling ● Mathematical Routines ● Experimental Methods ● Data Analysis ● Argumentation ● Make Connections | <p>not toward a pencil?</p> <p>How can the acceleration due to gravity be modified?</p> <p>How can Newton’s laws of motion be used to predict the behavior of objects?</p> <p>How can we use forces to predict the behavior of objects and keep us safe?</p> <p>How is the acceleration of the center of mass of a system related to the net force exerted on the system?</p> <p>Why is it more difficult to stop a fully loaded dump truck than a small passenger car?</p> |
| 19 | <p>Unit 4: Energy <i>You’ll learn the definitions of and relationships between energy, work, and power.</i></p> | <p><u>BIG IDEAS:</u></p> <ul style="list-style-type: none"> ● Force Interactions ● Change ● Conservation <p><u>SCIENCE PRACTICES:</u></p> <ul style="list-style-type: none"> ● Modeling ● Mathematical Routines ● Experimental | <p>How does pushing something give it energy?</p> <p>How is energy exchanged and transformed within or between systems?</p> <p>How does the choice of system influence how energy is stored or how work is done?</p> |

| | | | |
|----|---|---|---|
| | | <p>Methods</p> <ul style="list-style-type: none"> ● Data Analysis ● Argumentation ● Make Connections | <p>How does energy conservation allow the riders in the back car of a rollercoaster to have a thrilling ride?</p> <p>How can the idea of potential energy be used to describe the work done to move celestial bodies?</p> <p>How is energy transferred between objects or systems?</p> <p>How does the law of conservation of energy govern the interactions between objects and systems?</p> |
| 12 | <p>Unit 5: Momentum <i>You'll explore the relationship between force, time, and momentum and learn to use the law of conservation of momentum to analyze physical situations.</i></p> | <p><u>BIG IDEAS:</u></p> <ul style="list-style-type: none"> ● Force Interactions ● Change ● Conservation <p><u>SCIENCE PRACTICES:</u></p> <ul style="list-style-type: none"> ● Modeling ● Mathematical Routines ● Scientific Questioning ● Experimental Methods ● Data Analysis | <p>How does pushing an object change its momentum?</p> <p>How do interactions with other objects or systems change the linear momentum of a system?</p> <p>How is the physics definition of momentum different from how momentum is used to describe things in everyday life?</p> <p>How does the law of the conservation of momentum govern interactions between</p> |

| | | | |
|----|---|--|---|
| | | <ul style="list-style-type: none"> ● Argumentation ● Make Connections | <p>objects or systems?</p> <p>How can momentum be used to determine fault in car crashes?</p> |
| 2 | <p>Unit 6: Simple Harmonic Motion <i>You'll use the tools, techniques, and models you've learned in previous units to analyze a new type of motion: simple harmonic motion.</i></p> | <p><u>BIG IDEAS:</u></p> <ul style="list-style-type: none"> ● Force Interactions ● Conservation <p><u>SCIENCE PRACTICES:</u></p> <ul style="list-style-type: none"> ● Modeling ● Mathematical Routines ● Experimental Methods ● Data Analysis ● Argumentation ● Make Connections | <p>How does a restoring force differ from a "regular" force?</p> <p>How does the presence of restoring forces predict and lead to harmonic motion?</p> <p>How does a spring cause an object to oscillate?</p> <p>How can oscillations be used to make our lives easier?</p> <p>How does the law of conservation of energy govern the interactions between objects and systems?</p> <p>How can energy stored in a spring be used to create motion?</p> |
| 12 | <p>Unit 7: Torque and Rotational Motion <i>You'll explore the motion of an object rotating around an axis and you'll study</i></p> | <p><u>BIG IDEAS:</u></p> <ul style="list-style-type: none"> ● Force Interactions ● Change ● Conservation | <p>How does a system at rotational equilibrium compare to a system in translational equilibrium?</p> <p>How does the choice of system and</p> |

| | | | |
|---|---|--|---|
| | <p><i>torque, the measure of a force that can cause rotational motion.</i></p> | <p>SCIENCE PRACTICES:</p> <ul style="list-style-type: none"> ● Modeling ● Mathematical Routines ● Scientific Questioning ● Experimental Methods ● Data Analysis ● Argumentation ● Make Connections | <p>rotation point affect the forces that can cause a torque on an object or a system?</p> <p>How can balanced forces cause rotation?</p> <p>Why does it matter where the door handle is placed?</p> <p>Why are long wrenches more effective?</p> <p>How can an external net torque change the angular momentum of a system?</p> <p>Why is a rotating bicycle wheel more stable than a stationary one?</p> <p>How does the conservation of angular momentum govern interactions between objects and systems?</p> <p>Why do planets move faster when they travel closer to the sun?</p> |
| 3 | <p>Unit 8: Electric Charge and Electric Force <i>You'll begin your exploration of electricity by learning</i></p> | <p>BIG IDEAS:</p> <ul style="list-style-type: none"> ● Systems ● Force Interactions ● Conservation ● Waves | <p>How does electric charge change the way that something interacts with its surroundings?</p> <p>How do you decide what to believe about scientific claims?</p> |

| | | | |
|----------|---|---|---|
| | <p><i>about the electric force and the properties and interactions of electric charges.</i></p> | <p><u>SCIENCE PRACTICES:</u></p> <ul style="list-style-type: none"> ● Modeling ● Mathematical Routines ● Argumentation ● Make Connections | <p>How does something we cannot see determine how an object behaves?</p> <p>How do charges exert forces on each other?</p> <p>How does the conservation of charge help us understand how charged objects behave?</p> <p>Why can you stick a balloon on the ceiling, if rubber is an insulator?</p> |
| <p>9</p> | <p>Unit 9: DC Circuits <i>You'll continue your study of electricity by examining electric circuits and the interactions between current, resistance, and voltage.</i></p> | <p><u>BIG IDEAS:</u></p> <ul style="list-style-type: none"> ● Systems ● Conservation <p><u>SCIENCE PRACTICES:</u></p> <ul style="list-style-type: none"> ● Modeling ● Mathematical Routines ● Experimental Methods ● Data Analysis ● Argumentation ● Make Connections | <p>How do you decide what to believe about scientific claims?</p> <p>How does something we cannot see determine how an object behaves?</p> <p>How do the laws of conservation of charge and energy allow us to light our homes and businesses?</p> <p>How does the conservation of charge govern interactions between objects and systems?</p> <p>How does the law of conservation of</p> |

| | | | |
|----|--|---|--|
| | | | energy govern the interactions between objects and systems? |
| 11 | <p>Unit 10: Mechanical Waves and Sound</p> <p><i>You'll get introduced to the properties and behavior of waves that travel through a medium such as air or water.</i></p> | <p>BIG IDEAS:</p> <ul style="list-style-type: none"> ● Waves <p>SCIENCE PRACTICES:</p> <ul style="list-style-type: none"> ● Modeling ● Mathematical Routines ● Scientific Questioning ● Experimental Methods ● Data Analysis ● Argumentation ● Make Connections | <p>How can data be used to help us create models of phenomena we see around us?</p> <p>Why does a police siren sound different when it is moving toward you than when it is moving away from you?</p> <p>What happens when two waves meet?</p> <p>How is resonance responsible for the Tacoma Narrows Bridge collapse?</p> <p>How is sound produced?</p> |
