CURRICULUM MANAGEMENT AUDIT

Invitation to Bid/Overview of Services

- **Overview of Initiative and Scope**

The Stamford Public Schools (SPS) is soliciting proposals from individuals, consultants, or organizations to provide expert services related to the conducting of an audit of its curriculum and instructional practices in all content areas, K-12. SPS seeks qualified providers who have prior successful experience conducting curriculum and instructional audits.

Presently, there exists across our system, varied approaches to the written curriculum that are sometimes significantly different in practice, resulting in different instruction, different materials being utilized, and ultimately different experiences for our student in classrooms across our schools.

The objectives of this initiative are to establish baseline information about our current instructional practices across our 21 schools, and specifically, to evaluate the status of each content area curriculum relative to State and National content area standards, and to determine if our instructional practices are aligned to the requirements of those standards. Additionally, we are seeking to evaluate the vertical articulation of content area standards in grades K-12.

Components of the curriculum audit must include, but are not limited to:

- Determining evidence of alignment to state and national content area standards
- Determining the curriculum materials presently in use and identify their alignment to that written and taught curriculum, identifying any gaps that may exist
- Determining the curricular needs of teachers
- Evidence of vertical and horizontal articulation of standards across the curriculum
- The evidence of instructional rigor observed in classroom instruction as defined by Webb's DOK, and 21st Century Learning Skills, Hess Complexity
- The evidence of differentiated instructional strategies incorporated in to our curriculum and instructional practices
- The evidence of classroom based interventions observed (based on the SRBI framework)
- The evidence of enrichment and extension strategies in our curricular, co-curricular and instructional practices
- The evidence of EL (English Learner) strategies in our curricular and instructional practices
- The evidence of consistency in the implementation of the curriculum system wide
- The evidence of technology integration across the subject areas
- A review of the policies and controls that govern the curriculum development process

The vendor must provide as part of their proposal, a specific explanation of what they would require from the district (materials, staff support, etc.) to complete the audit as requested.

With this information ascertained, we are looking to partner with a vendor who will make specific actionable recommendations for how we can apply the findings of the audit toward developing a new model for developing curriculum in Stamford.

Under this new model, schools will have local decision making to make choices about the approach they will adopt towards meeting the requirements and expectations set forth in the curriculum (including theme-based approaches to the curriculum, selection of supplemental resources and materials, etc.) A critical component of the work ahead will be developing a model of curricular development that strikes the right balance between the need for district-wide coherence, providing higher levels of building level autonomy while ensuring that there is equity for all Stamford students in their access to appropriate, standards-based, high-quality teaching and learning practices regardless of the school they attend.

The new model of curriculum development in Stamford must include:

- The development of curricular frameworks for each grade level content area, which will provide stated end of course outcomes. Additionally, these frameworks will provide teachers with recommended strategies for student intervention and academic extension and enrichment.
- The development of authentic performance tasks (formative and summative measures) for assessing student growth on all grade level standards.
- The development of rubrics to evaluate student performance on these assessments.
- The development of a series of new curricular templates for use at the classroom, building and district levels, as well as for public viewing.
- Identify areas of need for staff development at all levels to implement the recommendations of the audit.
- The development of policies, regulations and controls to define who is accountable, and who is responsible for different aspects of the curriculum development process and to guide the decision-making associated with the new model for curriculum in Stamford.

As part of the proposal, vendors must specify their recommendations for a timeline and sequential order of operations for how they would address the requested scope of work, as well as an articulated rationale for their recommended approach.

Following the implementation of the recommendations from the curriculum audit, our expectation is that there will be more continuity, consistency and congruence within the K-12 instructional core (curriculum instruction and assessment). Furthermore, the recommendations from the audit should lead to guaranteed, standards-based curriculum and experiences across the district.

- SPS seeks qualified individuals, consultants, or organizations that have prior successful experience with implementing a curriculum management audit.
- Requests for proposals will be available at the purchasing department section of the Stamford Public Schools (SPS) website: <http://www.stamfordpublicschools.org/district/finance-purchasing/pages/rfps-and-bids> starting **Monday April 15, 2019.**
- Contracts shall be awarded to the individual, consultants, or organization whose proposal best meets all criteria listed in the RFP.
- **Proposals must be sealed and received by Tuesday May 7, 2019 at 2:30 P.M.**
- Upon successful selection of a vendor, an award notification will be posted online at: <https://www.stamfordpublicschools.org/district/finance-purchasing/pages/rfp-contract-award-notification>
- **Insurance Requirements:** The selected proposer, upon the signing of the formal contract, will be required to deliver an insurance certificate in amounts, companies, and terms acceptable to the Risk Manager of the City of Stamford. (*See section A.5 for further info*)

6.14 Independent Contractor Status

It is the intent of this proposal that the successful bidder is an independent contractor, and not an employee or agent. Nothing in this proposal or the contract to be signed shall be interpreted or construed as creating or establishing the relationship of employer and employee between the Stamford Public Schools and the Agency, or any employee or agent of the Agency, or between the Agency and any agent or employee of the Board. Both parties acknowledge that the Agency will not be an employee for federal or state tax purposes.

B. Background

The district includes eleven K-5 elementary schools, (3 of which are magnet schools), two K- 8 inter-district magnet schools, five middle schools (one of which is a magnet school and one is International Baccalaureate), and three high schools, (two large comprehensive high schools and the third is an inter-district magnet high school focusing on information technology and engineering).

Currently, SPS uses a variety of curriculum materials to advance its instructional programming. These documents, materials and resources provide guidelines for teachers and administrators for developing an instructional approach to the curriculum in their schools, however different schools utilize these materials in different ways. Therefore, the audit is needed to establish baseline information about current practices.

- Assess curriculum against state, national and ISTE content area standards
- Assess the congruence between the written and taught (instructional practices) curriculum
- Assess assessments against the demands/requirements of the content level standards (state and nation) in each standard
- Assess the current curriculum, assessment and instructional policies against standards for policy **and** SPS vision for curricular renewal and assessment practices
- Collect data, evidence and artifacts about the following:
 - Curriculum Documents
 - Use of instructional time, (i.e. the number of instructional minutes devoted to each content area, by grade level and by school)

 - Leveling practices (by school, grade level and subject area)
 - Program components
 - Curriculum materials (i.e. textbooks, etc.)
 - Identify supplemental resources (by content area, grade and school)
 - Assessment practices (types of assessment in use, frequency of assessment, usage of assessment data) by school, grade level and content area

- Provide specific recommendations, based on the findings of the audit, about priority areas and how to implement any necessary changes to our current curriculum, instruction and assessment practices to achieve the vision for curriculum development described in the audit.
- Due to the large scope of this work, we are approaching this initiative in phases. **Vendors must provide as part of their proposals a plan for phased implementation of this work in large, complex district such as Stamford.**

- Collaborating with central office and building level personnel to accomplish the purposes of the audit
- Working with SPS staff to obtain needed documents, data or other evidence and schedule interviews, focus groups and site visits to school and classrooms
