DAVID DIPISA

School Business Administrator Board Secretary

JAMES A. CORINO, ED. D. Interim Assistant Superintendent

July 28, 2016

Dear Parents and Caregivers,

Starting with the 2016-17 school year, NJ school districts are required to test their drinking water for lead. New rules regarding lead testing in water were implemented by Governor Chris Christie after elevated lead levels were found last year in the water of several school districts, including Newark. Officials declare that potential exposure to lead-contaminated drinking water poses serious health risks.

Under the new rules adopted by the state, school districts in New Jersey that have not tested their drinking water for lead must do so within one year. These new regulations also mandate districts to test the water used for drinking and cooking at least once every six years.

These new regulations were passed by the State Board of Education on Wednesday, July 13, 2016. All NJ districts which test within a year of these new regulations are granted eligibility for reimbursement of testing costs through the state of NJ. Districts are also given the opportunity to apply for a one-year extension if their water has been tested within the past five years.

The Lyndhurst Public Schools conducted lead testing district wide from June 7, 2016 through June 9, 2016. There were fifty-two (52) samples taken and tested by McCabe Environmental Services, LLC.

We are pleased to report that only one (1) sink, located in the office of the high school athletic trainer, by the gymnasium, did not pass the lead test. This sink has been placed out of service and follow-up tests are being conducted, as required by regulation, to locate the origin of the problem and resolve it accordingly.

A complete report of each school's test results can be found on the respective school's website. Go to www.lyndhurstschools.net. and click on the tab of the school to view this information. If any further questions need to be answered, please contact David DiPisa, the School Business Administrator of the Lyndhurst Public Schools, at 201.438.5683 x4728.

Sincerely,

David Dipisa

School Business Administrator/Board Secretary

1.0 INTRODUCTION

McCabe Environmental Services, L.L.C. (McCabe) was retained by Lyndhurst Board of Education to conduct lead in drinking water testing at Lincoln School.

MES Project No.: 16-03008

Date: 06/21/2016

The project information is as follows:

Client Name:

Lyndhurst Board of Education

Contact Person:

Mr. David DiPisa

Project Name:

Lincoln School

Project Location:

281 Ridge Road

Lyndhurst, New Jersey 07071

Date(s) of Service:

June 7, 2016

McCabe Personnel:

Matthew Smith

2.0 SCOPE OF WORK

Drinking water testing was performed at Lincoln School on June 7, 2016. The purpose of the testing was to determine if the building's plumbing was having an adverse impact on water quality, specifically with regard to lead concentrations. Samples were collected from various potential drinking water outlets located throughout the building.

3.0 PROCEDURES

After determining which outlets would be sampled, McCabe personnel collected a "first draw" sample at each location. A "first draw" is the initial water that is first to come out of the tap after a period of inactivity. All samples were collected into 250 mL sterile bottles, labeled with a sample identification, and analyzed in accordance with EPA approved methods to determine the level of lead in drinking water. Samples were analyzed by an accredited laboratory.

The U.S. Environmental Protection Agency (EPA) has established National Primary Drinking Water Regulations (NPDWR) that set mandatory water quality standards for drinking water contaminants. These are enforceable standards called "maximum contaminant levels" or "MCL", which are established to protect the public against consumption of drinking water contaminants that present a risk to human health. An MCL is the maximum allowable amount of a contaminant in drinking water which is delivered to the consumer.

The EPA has established the Lead and Copper Rule that sets standards for state and public water systems. This rule has set an MCL for lead at 15 parts per billion (ppb) for a one liter sample. However, the EPA also established the Lead in Drinking Water at Schools and Child Care Facilities Guidelines in which the EPA recommends an MCL of 20 ppb for a 250 milliliter first draw sample. In order to be more stringent, for our report purposes we have compared all results to both the 15 ppb and the 20 ppb standards.

McCabe Environmental Services, L.L.C.

Client: Lyndhurst Board of Education - Lincoln School

TABLE OF SAMPLE RESULTS

4.0

Table 4.1 presents all sample results:

	Table 4.	1		
Sample ID	Sample Location	Lead Result (ppb)	Exceeds (MCL 15 ppb)	Exceeds (MCL 20 ppb)
LS-01	Faculty Lounge – Sink	< 1.0	Pass	Pass
LS-02	First Floor – Water Cooler	< 1.0	Pass	Pass
LS-03	Basement – Water Cooler	< 1.0	Pass	Pass
LS-04	Second Floor – Water Cooler	< 1.0	Pass	Pass
LS-05	Third Floor – Water Cooler	< 1.0	Pass	Pass
LS-06	Third Floor – Teacher's Room - Sink	5.0	Pass	Pass

MES Project No.: 16-03008

Date: 06/21/2016

5.0 **DISCUSSION AND CONCLUSION**

As per Table 4.1, a total of six (6) samples were collected from Lincoln School. All samples were found to be less than the EPA Lead in Drinking Water at Schools and Child Care Facilities standard of 20 ppb, as well as less than the EPA Lead and Copper Rule standard of 15 ppb.

McCabe recommends annual drinking water sampling to ensure that the building's plumbing is not having an adverse impact on water quality.

Client: Lyndhurst Board of Education - Lincoln School

MES Project No.: 16-03008 Date: 06/21/2016

APPENDIX A

LABORATORY CERTIFICATES OF ANALYSIS & SAMPLE CHAIN OF CUSTODY FORMS

Monday, June 13, 2016

Attn: Janet Leone McCabe Environmental Services, LLC 464 Valley Brook Avenue Lyndhurst, New Jersey 07071

Project ID:

16-03008

Sample ID#s: BN49978 - BN49983

This laboratory is in compliance with the NELAC requirements of procedures used except where indicated.

This report contains results for the parameters tested, under the sampling conditions described on the Chain Of Custody, as received by the laboratory.

A scanned version of the COC form accompanies the analytical report and is an exact duplicate of the original.

If you have any questions concerning this testing, please do not hesitate to contact Phoenix Client Services at ext. 200.

Sincerely yours,

Phyllis/Shiller

Laboratory Director
