## PREFACE

The **Guide for Standard Operating Procedures and Internal Controls** is a document that outlines the business practices that are approved by the Sayreville Board of Education and administered by the Business Office. It is intended to be used as a reference manual by administrators, secretaries and any staff members that have Budgetary/Financial responsibilities. Its purpose is to provide an efficient, control and accountability system that will help assure appropriate use of “Public Funds”. It must be understood that the principles of this manual are based on, “Generally Accepted Accounting Principles,” and rely on an assumption that individuals have a general understanding of the financial process of a School System. For this program to operate at optimum efficiency there must be a spirit of cooperation, teamwork and communication between the school staff and the Business Office.

## SECTION I – INTERNAL CONTROLS

### PUBLIC SCHOOL DISTRICT INTERNAL CONTROL DOCUMENT

#### OVERVIEW:

Internal controls are not separate systems of the school district. Controls are not an isolated activity but integral part of each activity used to guide the district.

Establishment, maintenance and evaluation of the internal controls are the responsibility of the administration. The evaluation of internal controls includes identifying the framework used by the administration to determine the effectiveness of the internal controls.

Controls are in place to detect or prevent errors and fraud. An error is an unintentional mistake that has the potential to affect the financial statements and fraud is the intentional misuse or misappropriation of district's assets.

#### OBJECTIVES OF INTERNAL CONTROL:

The three objectives of internal control are to ensure the effectiveness and efficiency of operations, reliability of financial reporting, and compliance with applicable laws and regulations. The safeguarding of assets is a subset of all of these objectives.

Continuous monitoring and testing is needed to help to identify poorly designed or ineffective controls. The administration is also responsible for communicating the objectives of internal control and ensuring the organization is committed to sustaining an effective internal control environment.

#### COMPONENTS OF INTERNAL CONTROLS:

The five components of internal controls include the control environment, administration's risk assessment, administration's communication of the controls, control activities and monitoring of the controls.

#### CONTROL ENVIRONMENT:

The control environment includes the organizational structure, the control framework, the district's policies and procedures and internal and external influences. The tone set by the school district's board and administration determines the attitude toward the controls of the district.

#### ORGANIZATIONAL STRUCTURE:

The organizational structure determines the administration's responsibilities and the sets the relationship with the board, which sets the policies.

#### CONTROL FRAMEWORK:

Elements of a control framework include the following:

Segregation of duties to help ensure the reliability of the organization's internal controls, one person should not have access to all stages of a process. If there is not proper segregation situations could arise where errors or irregularities occur and go undetected.

Integrity and competence of the personnel performing the duties are key to achieving the desired controls. This includes hiring the proper people and continually training personnel. It is important to ensure that employees who perform financial tasks have the knowledge and skill to perform their duties.

Communication by the administration of the controls and the employee's responsibilities are as important as ensuring that employees know how to communicate irregularities that may arise.

## SECTION I – INTERNAL CONTROLS

Proper supervision of employees is needed to ensure proper execution of control activities.

### DISTRICT'S POLICIES AND PROCEDURES:

The district's policies set the overall direction of the district. Procedures for all areas of financial preparation, reporting, operations, transportation, maintenance, personnel and payroll are needed. These policies and procedures will become the basis for the determination of compliance.

### ADMINISTRATION'S RISK ASSESSMENT:

The administration has to conduct an assessment of risks relevant to the financial statements. This includes the identification of potential risks, the analysis of the potential impact of those risks on the ability to properly report the financial statements and the overall management of risks.

Items to consider in the risk assessment of the district include, but are not limited to:

1. New personnel or new duties for existing personnel
2. How a change in accounting information system impacts controls and how effectively the training of personnel on new system was conducted
3. Changes in the regulations and laws that may affect the control environment
4. Record storage is appropriate and secure (fireproof cabinets when needed for manual documents and proper passwords and access limitations for electronic information)
5. District limits access to computers and data files
6. Segregation of duties
7. Transactions are recorded timely
8. Cash is deposited timely
9. Assets are physically safeguarded
10. Transactions are performed by only authorized personnel
11. Reconciliations are properly and promptly completed
12. Occurrences of management override

### INFORMATION AND COMMUNICATION:

The administration needs to determine if the information systems utilized in the district are adequate and relevant for their intended purpose.

The district's administration is responsible for communicating the controls of the district and the responsibilities of each employee in the control system.

The administration is also charged with reviewing information that may indicate a flaw in the controls that would not allow the control to detect an error in a timely fashion.

### CONTROL ACTIVITIES:

Control activities include the policies and procedures that are in place to achieve the controls desired.

Documentation of the control activities is vital to the overall control environment. These activities include, but are not limited to:

1. Segregation of duties
2. Transactions are recorded timely
3. Cash is deposited timely
4. Assets are physically safeguarded
5. Transactions are performed by only authorized personnel
6. Reconciliations are properly and promptly completed

## SECTION I – INTERNAL CONTROLS

### CONTROL ASSERTIONS:

Control activities can be categorized into one or more assertions. All assertions should be addressed for each process (payroll, cash disbursements, etc).

1. Existence (E) /Occurrence (O) – Existence is whether the assets or liabilities of the district exist at any given point in time (cash, state aid receivable). Occurrence is the whether the transaction took place (goods were received before the PO was moved to accounts payable from encumbrances)
2. Valuation (V) or Allocation (A) – Valuation is whether the asset or liability is included on the board secretary's report at the proper value (the amount of cash or state aid receivable). Allocation is whether the revenue and expenditures were recorded in the proper amounts.
3. Accuracy/ Classification (A/CL) – transactions are recorded accurately and the classification of the transactions are proper.
4. Completeness (CO) – is whether all transactions are included (unrecorded purchase orders).
5. Cutoff (C) – Transactions are recorded at the proper time (purchase orders written in the proper year).

### MONITORING:

The administration is charged with reviewing internal controls on an ongoing basis. Monitoring can include responding to the recommendation of the auditor in changes in the controls. Reviewing correspondence from outside sources such as banks and vendors for unusual items is part of monitoring.

Employees should be required to “sign off” on their understanding of the control activities and their responsibilities in those activities.

### AFTER THE CONTROLS ARE ESTABLISHED:

Once the district establishes controls, those controls need to be evaluated at least annually and anytime circumstances dictate. Changes in personnel or regulations are examples of these.

As controls are evaluated they will either be effective or ineffective at achieving the proposed control. Controls are effective when there would be no material weaknesses in internal controls involved in financial reporting. Ineffective controls would be those where at least one material weakness exists. If a control is determined to be ineffective, then the control deficiency needs to be evaluated.

### CONTROL DEFICIENCIES:

A control deficiency exists when the design or operation of a control does not allow the administration to prevent or detect misstatements on a timely basis. A design deficiency exists when a necessary control is missing or is not designed to enable the control objective to be met. An operational deficiency exists when control is designed properly, but does not operate as designed or the person performing the control is not qualified to perform the control.

A deficiency may exist that is unavoidable (segregation of duties in a small office). For these, compensating procedures should be put in place. These compensating procedures do not correct the deficiency.

### REASONABLE ASSURANCE AND LIMITATIONS ON CONTROLS:

Reasonable assurance is a high level of assurance, but is not absolute. The district should understand that potential fraud could exist and not be detected timely in the following circumstances: when the district has poorly designed or operated internal controls, or when there are too many overrides of controls, when there is collusion between employees or between an employee and a third party.

## SECTION I – INTERNAL CONTROLS

### REVIEW OF DISTRICT PROCESSES:

When reviewing processes in the district, it may help to consider incorporating the “5 Ws”.

1. Who performs each activity? Who receives the outcome of the activities?

2. What activities are performed? What forms and reports are used? What computer systems and files are used?

3. When are activities performed? What is the sequence of activities? What is the timing of the activities? What is the frequency of the activities?

4. Where are activities performed (i.e., board office, school, etc.)?

5. Why are activities performed (i.e., what risks are controlled, what control assertion does process step serve, etc.)

One final consideration should be whether any changes to the process will increase the efficiency of the process or firm up the controls.

### CONTROLS LISTED:

The controls listed here are not intended to be a complete list of controls, as each district will have different processes, controls and concerns. These items should be used as a beginning for the review of controls.

**POSITION CONTROL  
STANDARD OPERATING PROCEDURE**

**Position control is a process to measure the current status of positions for personal services within the district in order to analyze their fiscal impact on the whole budget year. The impact of a position is determined by actual expenditures from the beginning of a fiscal year plus amounts set aside to cover appointments to the position for the remainder of the fiscal year.**

**The concept of position control implies that each position must be defined in specific terms and that the hiring procedure may not be completed until a specifically defined position exists for the applicant. Budget Status is determined by combining elements from the Position File, the Payroll Distribution File, and the Employee Data Base.**

**The base line year to use for position control is the snapshot date of February 1 of the prebudget year. Grouping should be established by budgetary function and object at a minimum.**

According to 6A:23A-6.8, districts shall maintain an accurate, complete, and up-to-date automated position control roster in order to track the actual number of employees, as well as, the category of employees in detail.

The position control roster shall:

1. Share a common database and be integrated with the district's payroll system;

## SECTION V – POSITION CONTROL

xiii. The date the position was originally created by the board. If the date the position was originally created is not available, this item shall represent the date the person currently filling that position was approved by the board.

### **A. Purpose**

The purpose of this Standard Operating Procedure is to describe forms and procedures needed to assign position control numbers and create, or abolish positions.

### **B. Scope**

These procedures cover all positions and all employees of the district.

### **C. Authority**

The assignment of PCN's should be initiated by the Superintendent's Office. Human Resources in conjunction with the Business Administrator should maintain a list available to the Superintendent's Office when hiring or transferring employees for the district. It is recommended that the PCN number be referenced in the resolution approved by the Board of Education.

### **D. Position**

A position is a set of duties and responsibilities specified in a specific job description assigned to be performed by an employee of the district. A position may be full-time, part-time, stipend, permanent/non-permanent, seasonal (summer school, after school, athletics, etc...) and either filled or vacant. A permanent position does not exist until it has been authorized and established by the Board of Education, Human Resource and the Office of Business Administration.

### **E. Position Control Number – Creating and Maintaining**

Position Control data is maintained in the Superintendent's Office. (See attached) It is recommended that monthly or semi-monthly before the payroll is processed a report or review be done of all employees being paid. This report or review should indicate at a minimum the individuals PCN and linked budgetary account to be charged. Individuals not assigned a PCN must be assigned one and any vacant PCN should be noted for future reference.

### **F. Position Control Number (PCN)**

A position control number (PCN) is created to represent each board approved contracted *position* within a district. These control numbers are attached to the budget spread, telling the system which account(s) the position is to be paid from. As the positions are filled, the corresponding control number is linked to the employee who is currently filling the position. Control numbers that are not linked to any employees represent vacant positions. An example: if your district has five board approved positions for high school math teachers, you would establish five PCNs to represent the five separate positions.

## SECTION V – POSITION CONTROL

PCNs are independent of employee records. Each PCN represents a separate *position* within the district, *not* the employee who fills it at any particular time. Thus, if an employee leaves a position and the position remains open, the PCN remains active in the system representing a vacant position to be filled. Once an employee is hired for that position, the vacant PCN is then assigned to that person.

Vacant PCNs can provide an area where a projected estimated salary amount may be entered, providing the district with the ability to budget for positions that are expected to be filled. An assigned PCN will forward a calculated salary into the budget projection. As PCNs represent *positions* within the district, they are only added or deleted when a job position itself is either created or phased out.

### **G. Request for PCN for a New Position**

Departments request for the use of PCNs for new positions or to reactivate an abolished position shall include detailed justification and a cost benefit analysis. The superintendent will determine if the new position is justified, needed and that adequate funds are or have been budgeted. Based on this determination, the superintendent will decide if they will make a recommendation to the Board of Education. Upon approval from the Board of Education, the Superintendent will create a new PCN.

### **H. Other**

Each PCN shall be integrated with the payroll system to ensure that the correct budgetary account is charged. The PCN system should be able to track through payroll and the personnel system the position by account number, individual, PCN and the history of the use of the PCN.

### **I. Sample Reports**

The attached sample reports are to give the SBA information on the actual full function of the use of an integrated and non-integrated PCN system and suggestions for creating actual position control numbers for staff within their particular district.

- Personnel to Payroll Spread – This report compare personnel information to payroll.
- History Report-This report shows reflects who has been assigned to a specific PCN.
- PCN by alpha-A simple alphabetical list indicating FTE, PCN, budgetary account charged, percent charged and salary charged.
- PCN by budgetary account- A list of all staff by budgetary account code with PCN, FTE, budgetary account charged, percent charged and salary charged.
- Recommendation for Formation of Position Control Numbers – Examples for PCN segments.

## SECTION V – POSITION CONTROL

- Position Control Sample Spreadsheets-These are examples of small districts that are not using integrated systems of how PCN can be controlled using simple spreadsheet formats.
- Internal Control Questionnaire- An example of the segregation of duties with regard to the assignment of Position Control Numbers.

## INTERNAL CONTROL QUESTIONNAIRE - EMPLOYEE DUTIES

This form is used to tabulate the separation of employee duties. It may be used by itself or in conjunction with a narrative, flowchart or other means of documentation. The name of the employee or the identification of the group performing an identical function is to be written in the space provided at the top of each column. On the applicable horizontal line, if the duty listed is a primary one for the employee, that is, one which he performs with considerable regularity, the numeral 1 should be used. If the duty listed is a secondary one, that is, one which he performs more or less infrequently as a back up for the usual performer, the numeral 2 should be used. Upon the completion of the questionnaire, a careful analysis should be made to ascertain whether or not a proper separation of duties exists. Any conflicts existing in the current division of duties should be indicated on the evaluation of employees' duties sheet.

**Title:** Purchasing Procedures  
**Sub-Title:** Authority to Purchase, Bidding and Quotations  
**Authority to Purchase:**

According to New Jersey State statute 18A:18A-2(b), the Purchasing Agent/School Business Administrator is the only individual in the school district that has the authority to make purchases for the Board of Education.

**Authorized Purchases**

All requests for the purchase of goods and /or services must be made through an approved purchase order signed by the School Business Administrator. No goods or materials may be ordered or work/service be authorized to begin by any other individual in the school district other than the School Business Administrator.

**Unauthorized Purchases**

Any Board of Education employee who orders and/or receives any materials, supplies or services without going through the approved purchase order process has made an unauthorized purchase that may be subject to disciplinary action.

**Procedure:**

1. **QUOTATIONS:** When a single item or service, or group of like items cost between **\$4,350 to \$29,000, two quotations are required.** Notification of this range will be sent throughout the district by July 1, of each year. Quotations are to be attached to the Purchase Order for submission to the Business Office.
2. **BIDDING PROCESS:** When a single item or service of a group of like items are at **\$29,000** or greater, the formal bidding process through the Business Office is required (July 1, the threshold amount will be sent to the offices). Building Principals or Program Supervisors are responsible for providing the Business Office with detailed specifications and a list of vendors (if requested) for each item or service being purchased. The legal process takes approximately four to eight weeks from the date of the Business Office receives the request and specifications. After award of the bid the Business Administrator will notify the appropriate party of the award and the person requesting will submit a purchase order.
3. If the vendor has a State Contract Number, no quotes or bids are necessary, however the State Contract Number must appear on the purchase order.

## SECTION VI – PURCHASING

4. **OTHER ITEMS:** The purchase of any single item or service not falling into one of the above categories must be processed on a purchase order which will be approved by the School Business Administrator prior to the purchase. This means **there will be no purchase orders authorized by a telephone call by a Principal, Supervisor, Teacher or other staff member.** Board members/staff members attending conventions or workshops are not to make purchases in the name of the school district without following the purchasing process. All purchases of goods and services require a purchase order to be generated with approval from the Superintendent and Business Administrator.
5. **Preview of Materials:** All staff members must receive permission from Principals or Supervisors **to preview materials.** After the preview process has been completed, the item must be returned. If there is a desire to purchase the previewed item, then a purchase order must be originated for a new item.. All purchases must go through the Business Office.
6. **Reimbursements of employees:** The Board of Education recognizes an employee reimbursement purchase order when it pertains to pre-approved travel, meal and conferences. The Board **will not reimburse** employees for items and goods personally purchased by the employee as these items are required to be purchased through a vendor through the purchase order system.
7. **Student Activity Accounts:** Purchases made through Student Activity Accounts may not be reimbursed with Board funds. Purchase orders made payable to the Student Activity Accounts for the aforementioned purpose will not be signed by the Purchasing Agent.

## SECTION X– RISK MANAGEMENT

**Title:**                   **Loss Control**

**Subtitle:**               **Injuries**

**Procedure:**

### **STAFF INJURIES**

Every employee is entitled to work under the safest possible conditions. In order to insure this, it is necessary that every accident/injury be reported.

All incidents/ accidents must be reported by the employee to their Supervisor within twenty-four (24) hours after the incident occurs. In the case of injury an accident report must be filled out within twenty-four (24) hours. If there is an employee accident, the employee is to report it to the nurse/ supervisor and fill out the **NOTICE OF EMPLOYEE INJURY Form**. If the employee needs medical treatment they will then call Workers Compensation.

The employee will speak to a nurse who will obtain detailed information and make the arrangements for treatment. If further specialized treatment is needed, it must be approved by the School Workers' Compensation physician who will refer the employee to a specialist for this treatment. Failure to go to the Board's doctor will result in a possible rejection of the claim. The school's workers' compensation doctor or the referred doctor will determine when the employee may return to work. The report will be given immediately to the assigned Principal/Supervisor for review and signature and sent to the Business Office.

If the accident or injury is an emergency, the employee may be treated at the nearest hospital and report the accident as soon as possible to Administration/Supervisor. Employee should instruct the hospital, doctor or pharmacy to forward all bills to Business Office (Workers' Compensation Claims). It is NOT recommended that the employee use his/her personal insurance card as this will complicate and delay the prompt payment of any medical bills.

### N.J.A.C. 6A:23A-6.7

#### **Directive**

Pursuant to 6A:23A-6.7 school districts and county vocational school districts with budgets in excess of \$25,000,000 or with more than 300 employees shall maintain an enterprise resource planning (ERP) system which integrates all data and processes of an organization into a unified system. An ERP system uses multiple components of computer software and hardware and a unified database to store data for the various system modules to achieve the integration. NOTE: This system does not include student, transportation or food service databases or modules.

#### **ERP System Integration Features**

Three applications – comprise an ERP; accounting, payroll, and human resources system. System integration permits data sharing among the three applications, therefore eliminating any duplication of data entry. System integration features facilitate data sharing not only among the applications, but may also with third-party payroll, substitute placement/absence tracking, and bidding applications. Integration between these applications allows for the automation of many functions, enabling:

#### **In Accounting**

System-generation of the payroll purchase order and encumbrances at the start of each new fiscal year (salary amounts and expense account information from Payroll is used to create the file needed to generate the payroll PO encumbrances in Accounting).

Update/adjust payroll PO encumbrances throughout the year to reflect any staff/budget changes (updated salary/expense account information from Payroll is used update payroll PO encumbrances in Accounting). Automatically reduce payroll PO encumbrances to expenditures each pay period (transfer of payroll expenditure data from Payroll, or a third-party application such as ADP, to Accounting). Import next year's budget preparation data directly into a Budget Projection Module (transfer of salary data either from Personnel, or a third-party application such as Microsoft Excel, into Accounting).

#### **In Payroll**

Automatically update new fiscal year payroll salaries for all employees (transfer of contracted salary data from Personnel to Payroll). Or synchronize remaining contract days that can be printed on employees' payroll check stubs (transfer of remaining sick/personal/vacation day balances from Personnel to Payroll).

#### **In Personnel**

Import attendance information (automatically generating employee attendance records within Personnel from your AESOP or SUBFINDER system). Implement position control codes (transfer of employee budget spread data from Payroll via alpha/numeric position control code for each employee record within Personnel). Automatically update position control budget spread information (based on payroll budget spread changes – transfer of updated budget spread

## Section XV- Financial and Human Resource Management Systems

data from Payroll updates Position Control Code budget spread data in Personnel). Generate projected salary data, by expense account, for budget preparation (transfer of employee salary data and Position Control Code budget spread information from Personnel to an Accounting's Budget Projection Module).

Payroll budget spread information can also be imported into Accounting from third-party applications such as ADP. Those not utilizing system integration will obtain the payroll budget spread database file from their individual payroll provider instead. If utilizing an outside provider, districts should ensure that the expense account structure for the employee's budget spread in the third-party application is consistent with the expense account structure established within Accounting.

Import Budget Preparation Data into a Budget Projection Module (Personnel to Accounting)

Accounting may include a budget projection module designed specifically to assist school districts with next year's budget preparation. This module includes a function allowing for the import of data (either from Personnel or a third-party application such as Microsoft Excel). This Projected Salary Data File (with the use of unique position codes, the system will automatically project, based on your district's settled contract information, the total amount needed for each salary expense account).

Additional Benefit:

- Import the Projected Salary Data into the Accounting's Budget Projection Module (all employee names and salaries that comprise the projected total will be detailed for each expense account).

Automatically Update New Fiscal Year Payroll Salaries for all Employees (Personnel to Payroll)

At the beginning of each new fiscal year, salary information can be updated for all employees automatically. Districts who utilize third-party payroll applications (such as ADP) may have to manually enter in each new salary amount for every single employee. If system integration is used this should be an automated process for those districts that utilize both Payroll and Personnel applications. Personnel provides the ability to maintain historic, current and future year salary information, allowing Payroll to access this data when it is time to update individual employee salaries.

Synchronize Contracted Salaries

This function would update the "Salary" field with employees' total calculated salary amounts from Personnel.

Print Sick/Personal/Vacation Day Balances on Employee Check Stubs (Personnel to Payroll)

## Section XV- Financial and Human Resource Management Systems

Districts routinely provide employees with their balance of contract days throughout the year. One method to provide this information is to generate a hard copy report (which can take some time to print and distribute to each and every employee).

Districts that utilize system integration have the ability to streamline this process by synchronizing this information between the two applications, allowing the balance of contract days to be printed directly on the employee's check stub in Payroll.

Implement Position Control Codes or Numbers (PCN), and Automatically Update Position Control Budget Spread Information (Payroll to Personnel)

Utilizing a synchronized Personnel and Payroll applications give the ability to implement position control codes, as well as automatically update position control budget spread information as necessary. Position Control Codes or Numbers (PCNs) represent distinct, board-approved, contracted job positions. The budget spread for each position is defined, providing a powerful in-house management and budgeting tool. Key benefits of utilizing PCNs include features that allow your district to:

Validate current year budget appropriations against Personnel contracted salaries, by account.

Present salary projection analysis to the board to assist with budget projection for the next fiscal year.

Track and project the district's vacant positions, allowing for more accurate budget projections.

Import future year salary data directly into Accounting's Budget Projection Module.

Utilize employee budget spread information from Payroll to generate PCN in Personnel.

In short, a unique code is created to represent each board-approved contracted position within your district. These codes are referred to PCNs. The budget spread is attached to these codes, telling the system which account(s) the position is to be paid from. As the positions are filled, the corresponding PCN is linked to the employee who is currently filling the position. PCNs that are not linked to any employees represent vacant positions. For example, if your district has five board-approved positions for high school math teachers, you would establish five PCNs to represent the five separate positions.

PCNs are independent of employee records. Each PCN represents a separate position within the district, not the employee who fills it at any particular time. Thus, if an employee leaves a position and the position remains open, the PCN remains active in the system representing a vacant position to be filled. Once an employee is hired for that position, the vacant PCN is then assigned to that person.

## Section XV- Financial and Human Resource Management Systems

Vacant PCNs provide an area where a projected estimated salary amount may be entered, providing the district with the ability to budget for positions that are expected to be filled.

When PCN is linked to an employee record, the calculated salary for that employee overrides the vacant salary amount entered for the PCN.

As PCNs represent positions within the district, they are only added or deleted when a job position itself is either created or phased out.

### Meaningful vs. Non-Meaningful PCNs

Each PCN must be unique and can be up to 20 characters or digits. A PCN can either be a random string of numbers with no meaning attached to it – like a PO number – or it can be a string containing meaningful segments – like an expense account number.

Meaningful PCNs are critical for position control, as they allow the positions they represent to be more easily identified. They are also easier to relate to when using the PCN associated reports.

Non-meaningful PCNs are a random string of numbers with no meaning attached to it. Position control is more difficult, as is using the related reports.

### WHAT A SBA SHOULD DO....TO IMPLEMENT 6A:23A-6.7?

1. Do we need to comply given district budget or populace?
2. Look at current systems utilized (i.e. fund accounting, payroll and personnel) for integration or expansion.
3. Define needs-are systems in place fully utilized? Is training necessary to implement system capabilities? Is there no integration in place?
4. If utilizing multi modules (systems) i.e. ADP payroll, Microsoft Excel position control, outside fund accounting module....can they be integrated? If so, have approval for utilization been obtained from the ESC?
5. Does the system..... (Fund accounting, personnel, and payroll) currently being utilized sufficiently meets the requirements of 6A:23A-6.7? If so, has approval been obtained from the ESC?
6. If not able to expand current systems for appropriate utilization, is there another district or county organization that can accommodate needs? (Remember to check with the ESC for potential providers)
7. What expenditures are available to extend to the full integration of systems (ERP)? Does the additional cost add directly to the districts administrative limits or can the additional cost be shifted to an outside agency (i.e. bank payment for services)?
8. What are the “quiet” costs of system integration?
  - New equipment (servers, wiring, computers)
  - Supplies ( paper, checks, ink and associated copy costs)
  - Staffing (training and number to respond to necessary reporting, daily updates, etc.)
  - Facilities (is there room for all necessary equipment, supplies and staff?)
9. If it is necessary to research outside ERP systems, are they able to give you a BETA for 2010/2011? Are they state approved for compliance?
  - In looking at ERP systems, does the potential system allow for control over access and audit trail for access to all system components?
  - Does the anticipated ERP system allow for appropriate updates for all systems within or outside pursuant to DOE requirements?
  - Has the proposed ERP system been used in full by NJASBO members within the last three (3) years?
  - Is the proposed ERP system harmonious to NJSA and NJAC requirements
  - Does the proposed ERP system allow for staff training, support updates, appropriate back up of information and back up for start up?

## Section XV- Financial and Human Resource Management Systems

### **Determination**

Once the aforementioned is reviewed and the priorities or direction of the district is established the SBA in conjunction with the CSA should approach the Board of Education with their findings. The Board of Education should prior to determination, analyze the recommendation for ERP compliance, but make sure that all changes in procedure and process also adhere to Board of Education policy, maintain appropriate user authority and user access and district wide protocols for accessibility.

### **Internal Controls**

The Board of Education should establish internal control procedures for all systems (fund accounting, personnel and payroll) regardless of true system integration or multi systems (many modules) integration. No one individual should have control within all systems. Annual review should be done via an internal control check. (See attached sample document- which should be completed in-house and by the district auditor independently).

**Title: FREE AND REDUCED LUNCH APPLICATIONS****Procedure:**

The Free and Reduced Meal applications are sent to us electronically by the state. It is mandated that we use this form without change. The Food Service Department is responsible for getting the forms copied and distributed to all the schools. The youngest member of the household is to receive the application on the first day of school. The food service department sends this list to each school for meal application distribution. Once completed by the parent all applications returned are sent to the Food Service Department for processing. The Bookkeeper sends home a meal status notification letter to all applicants. Applications are kept at the Food Service department throughout the school year. Using Genesis for processing the application, the eligibility determination is forwarded to each students file and to the Point of Sale system. Each school secretary can view this information via Genesis. Verification of qualification for free and reduced meals is the responsibility of the Food Service Supervisor. Verification of applications must be completed in November.

**Elementary Schools Procedures**

The UES cafeteria has a computerized point of sale cash registers. After the student identifies himself with a Pin number, the picture of the student comes up on the screen along with the meal status code and any balance the student may have.

All money for meals is collected in the classrooms. The money is put into an envelope which is already labeled with the students name, teacher name, room number and grade, which is supplied by the school secretary. The envelopes are forwarded by the teacher to the main office where the cafeteria worker gets them and applies the money to the appropriate student account. At lunch time the student puts their PIN number into the cash register via PIN pad for items purchased. No money is exchanged at lunch time. At the end of each day the cafeteria worker counts out all money received and posts it to the point of sale. The physical cash received should match the money posted to student's accounts. At the end of each day the cafeteria worker prints out a daily sales report and sends it to the Food Service office. Any problems or questions during the course of the day are to go to the Bookkeeper in the Food Service department. Any discrepancies are to be called into the Bookkeeper prior to closing out for the day.

### **Middle School and High School**

In these two schools the students deposit money directly with the cashier while they are purchasing meals. The meal eligibility status is on the point of sale screen, reducing overt identification. All meal statuses are shown by a symbol. Students have the option of depositing as much money as they wish in their account. All deposits and purchases go thru the cashier during lunch time.

At the end of the day the manager print out the daily sales reports. The cashiers can view these numbers prior to printing to verify cash received against sales. Any problems are referred to the manager. The cashiers need to advise their managers of any money discrepancies.
